## FAN COIL TECHNICAL CATALOG

---

International Environmental Corporation (IEC) works continually to improve its products. As a result, the design and specifications of each product may be changed without notice and may not be as described herein. Please contact IEC for information regarding current design and product specifications. Statements and other information contained herein are not express warranties and do not form the basis of any bargain between the parties but are merely IEC's opinion or commendation of its products. Manufacturer's standard limited warranty applies.

## Portfolio

### Hi-Performance Hideaway (HHY) 600 CFM to 2000 CFM

The Hi-Performance Hideaway (HHY) fan coil unit is designed specifically to meet the many varied requirements for a ceiling hideaway installation where there is a ducted, high-static application. Standard HHY units are constructed with 18 gauge galvanized steel and are provided with a galvanized finish.

### Hi-Performance Cabinet (HLY) 600 CFM to 2000 CFM

The Hi-Performance Cabinet (HLY) fan coil unit is suited for under-ceiling, mounted applications where high capacities are required. HLY units are supplied with an integral double-deflection discharge grille and hinged bar type, return air grille with a throwaway filter. Standard HLY units are constructed with 18 gauge galvanized steel and are provided with a powder-coat paint finish. HLY units are not suitable for ducted applications.

### Hi-Performance Hideaway w/ Plenum (HPY) 600 CFM to 2000 CFM

The Hi-Performance Hideaway with Plenum (HPY) fan coil unit provides the same basic features as the HHY plus a return air plenum. HPY units are shipped from the factory ready for installation with the plenum section in place. No field fabrication is required. HPY units are designed with interchangeable panels so that the unit may be modified on site to accommodate a rear or bottom return. Standard HPY units are constructed with 18 gauge galvanized steel and are provided with a galvanized finish.

### Portfolio, Cont'd.

#### Hi-Performance Horizontal Cased (HXY) 600 CFM to 2000 CFM

The Hi-Performance Cased (HXY) fan coil unit is designed for above or below the ceiling and is ideal for high-static, ducted applications where high output is required. Standard HXY units are fabricated of 18 gauge steel and are provided with a galvanized finish.

#### Hi-Performance Vertical Cased (VEY) 600 CFM to 2000 CFM

The Hi-Performance Vertical Cased (VEY) fan coil unit is designed for floor-mounted, vertical, ducted applications. VEY units are typically enclosed in partition walls or located in closets, utility rooms or other concealed locations. VEY units have a top panel which is provided with a one-inch discharge duct flange and a removable front panel which provides complete access to coils, factory-furnished valve packages, motor-blower and electric-heater assemblies. VEY units are available with a front or bottom return. Standard VEY units are constructed with 18 gauge galvanized steel and are provided with a galvanized finish.

## Special Applications

### Application Fit

- Multiple cabinet choices are available in 8 nominal sizes for application in a variety of room layouts.
  - Hideaway model (HHY) units are installed above the ceiling with or without ducted supply air and open “soffit” return with an optional ceiling-mounted return air filter-grille.
  - Hideaway model with plenum (HPY) units are installed above the ceiling with or without ducted supply air and ducted return air. The return air filter is either mounted on the unit plenum or installed in an optional ceiling filter-grille.
  - Cabinet model (HLY) units are equipped with a painted cabinet suitable for under-ceiling exposed applications. Specially selected motor and blower designs make this unit especially suited for non-ducted applications.
  - Horizontal cased model, high static (HXY) units are equipped with a galvanized cabinet suitable for above or below the ceiling, and are ideal for ducted supply and return air.
  - Vertical cased units (VEY) are ideal for air conditioning in apartments, offices, schools and many other applications. Top supply units are often located in mechanical rooms and supply air is ducted into multiple zones. Front or bottom return units with filter frames are available.

### Design Flexibility

- Easy to use ratings program to speed up project design.
- Standard and high capacity hydronic coils and DX coils are available to match the heating and cooling loads of the space.
- Optional powder paint finish colors and grille selections will complement most décors (HLY units).
- Optional 6" legs are available for the vertical (VEY) unit.

- Customizable cabinetry (HLY or HXY) makes these units ideal for renovation jobs or where special sizes are required to fit oversized valves and controls packages.
- HPY optional airflow configuration (rear return or bottom return) can be factory configured or field converted for maximum flexibility.
- Wide variety of factory assembled valve packages to meet desired controls specifications.
- Wide variety of optional insulation materials are available to address IAQ concerns.
- Optional condensate float switches are available to address latest building codes where required.

### Ease of Installation

- Optional factory assembled valve packages minimize the piping work at the job site.
- Optional unit mounted controls, service switches and fusing minimize the electrical work required on site.
- Units are tagged at the factory for clear identification on the job site.
- Opposite end connection units may minimize the field piping work on renovation jobs.

### Ease of Service

- All components are accessible by simply removing the access panel.
- Filters can be replaced without tools.
- Blower assembly easily removed from the rear of the coil for service and cleaning.

### Quality and Safety

- Every unit tested and inspected at the factory for trouble-free start-up.
- ETL listed. AHRI rated where applicable.

## FAN COIL TECHNICAL CATALOG

### Ratings and Listings

#### AHRI Certification

IEC's Hi-Performance Series units are certified in compliance with Air-Conditioning, Heating, and Refrigeration Institute (AHRI) industry standard AHRI-440-2008 for room fan coil units. Approved standard ratings are tabulated below.

#### C-ETL-US Listing

IEC's Hi-Performance units are listed by ETL. The C-ETL-US listing signifies that IEC's fan coil units have been examined by ETL and are in compliance with both the U.S. and Canadian applicable standards.

- NOTES: 1. Ratings are based on 80° F DB and 67° WB EAT, 45° F EWT, 10° F water temperature rise, high fan speed, motor voltage 115-1-60, and air flow under dry coil conditions.
2. For all application ratings, use IEC's Rating Program, or contact your local IEC representative.
3. For additional information, please consult the Directory of Certified Applied Air-Conditioning Products or AHRI's website at [www.ahrinet.org](http://www.ahrinet.org).
4. The AHRI Standard 440 certification program does not apply to unit sizes above 1500 nominal CFM.

### Motor Data

#### Motor Performance Data

EC Motors behave differently to changes in static pressure. The two tables below indicate full load amperage (FLA). In the motor tables below the ECM FLA condition occurs at 0.3" ESP

Note that this data is for design purposes and should not be used for an energy analysis. An EC motor reaches full load condition at the unit's maximum external static because it has increased output to maintain airflow. An EC motor decreases output with lower static causing the minimum power usage to occur at 0.0" w.g. ESP.

4. Sound power data is expressed in decibels, dB RE: 1 x 10<sup>-12</sup> w (picowatts).

## Electric Heating

Electric heaters are available on IEC Hi-Performance Series fan coil units for the following applications.

### Total Electric Heat

Total electric heat eliminates the requirement for a boiler. Heating and/or cooling may be available on an individual basis throughout the year. Two-pipe chilled water is used for cooling, and the electric heater is used for heating. Individual room controls can be supplied for either manual or automatic changeover.

### Auxiliary Electric Heat

Auxiliary electric heat is ideal for tempering room air between seasons and during the cooling season when chilled water is being circulated. Individual room controls are supplied to provide electric heat only when chilled water is being circulated. During the regular heating season, heating is provided by hot water being circulated in the system.

### Construction

The heater coils of high-grade resistance wire are supported by ceramic insulators on plated steel brackets. These heat elements are suspended directly in front of the fan outlet. High limit thermal cutouts protect the heater in the event of air failure. There are many special applications and control sequences for electric heat. For special applications, please consult the factory.

### Electric Heater Selection

Unit Type	kW	Unit Size							
		06	08	10	12	14	16	18	20
120V	2.0	•	•	•	–	–	–	–	–
	3.0	•	•	•	–	–	–	–	–
208 V 240 V 277 V	2.0	•	•	•	–	–	–	–	–
	3.0	•	•	•	–	–	–	–	–
	4.0	•	•	•	•	•	•	•	•
	5.0	–	•	•	•	•	•	•	•
	6.0	–	•	•	•	•	•	•	•
	7.0	–	–	•	•	•	•	•	•
	8.0	–	–	–	•	•	•	•	•
	9.0	–	–	–	•	•	•	•	•
	10.0	–	–	–	–	•	•	•	•
	12.0	–	–	–	–	–	•	•	•
14.0	–	–	–	–	–	–	–	•	

- NOTES: 1. All heaters are single stage and single phase.  
 2. Heaters over 48 Amps are subdivided and fused.  
 3. Electric Heating Capacities (BTUH) = Heater kW x 3413.  
 4. Consult factory for 50 Hz applications.

HHY20	56 (1422)	66 (1676)	47 (1194)	14-1/2 (368)	50 (1270)	51-3/4 (1314)	2	2	151

NOTES: \* Unit weights (shown in pounds) are based on dry coils, minimum rows and exclude packaging, valves or other components.

1. RH coil shown, LH opposite.
2. All dimension are +/- .25 (6). Drawing not to scale.
3. Product specifications are subject to change without notice.
4. Control box size and position may vary (consult factory).
5. Position may vary.
6. Service access is located on the front of the control box.
7. Knockouts on the bottom and side of the control box for incoming power connections.
8. Drip lip recommended. Required when valve PKG is ordered.

Drawing not to scale and is provided for reference only. Dimensions may vary with options ordered. Consult IEC website for up to date drawings.

## Standard Features and Options, Cont'd.

### Bipolar Ionizer Specifications

#### SPECIFICATIONS:

Airflow Capacity: ..... 2,400 CFM  
 Pressure Drop: ..... Less than 0.01 In. WG  
 Housing Material: ..... ABS  
 Weight: ..... 0.2 lbs.  
 Maximum Operating Temperature: ..... 200° F (93°C)

#### Electrical:

Voltage: ..... 24V AC (602)  
 Power Consumption: ..... Less than 1 watt  
 Frequency: ..... 50/60 hertz  
 Over Current Protection:.. 500mA Glass Cartridge Fuse  
 Lead Wires ..... 50"(L)

#### Ionization Output:

Mode of Operation ..... Needlepoint Type  
 Needle Configuration: ..... Brush Type

**DIMENSIONS:** See Figure 1

**APPROVALS:** Intertek/ETL Standard UL 867

Figure 1. Dimensions not to scale.

## Standard Features and Options, Cont'd.

### Control Packages

#### Controls

As detailed in the table below and on page 36, we offer control packages that fit most customer needs. Additional controls and devices are available to meet even the most demanding operating logic.

#### Low Voltage Control (24V)

The 85 Control Board (see page 39) offers simplified install and service with its plug-in connections and QR code for quick wiring diagram reference. It also offers LED diagnostics and built-in design flexibility for added features such as staged cooling or BAS signal input. The 85 Control board is available with most control schemes.

#### 85 Control Board Standard Features

- Simplified plug connections
- PSC or ECM control
- LED diagnostics (See IOM-100 for detailed LED function and outcome)
- QR code to wire diagram for ease of troubleshooting
- Conduit compatible for remote mounted control boxes
- Compatibility with all actuator types
- Removable thermostat connector

#### 85 Control Board Options

- ECM fan speed adjustment
- Staged Cooling: compatible with IEC Venture Wi-Fi Thermostat (E055 - 1520330)
- BAS signal input to interrupt fan and actuators
- Fusing and service switch with electric heat
- Changeover or aquastat sensor
- Condensate switch LED indication
- Damper control

#### Condensate Float Switch

This switch shuts down the motor, actuator and electric heat (if applicable) when the water level in the drain pan reaches an unsafe level.

#### Service Switches

We offer concealed service switches for use by maintenance and service personnel to shut off the power while working on the unit.

#### Fusing

We offer incoming power fusing for all units as well as blower motor and control sub-fusing (single power source wiring).

#### Other Control Options

- Unit mounted 3-speed switch (thermostat by others)
- 4-Speed silent switching board with potentiometers
- Low voltage remote shutdown relays (Special Quote)
- Fan and valve cycle applications (Special Quote)
- Thermostats available with large letter print for handicap applications (Special Quote)

### Standard Features and Options, Cont'd.

#### Controls Options

#### 85 Control Board

1	CN1 – 24V Customer Input (Thermostat)
2	CN2 – Changeover/Return Air Sensor
3	CN3 – Remote Shutdown Input
4	CN4 – Condensate Overflow Switch
5	CN5 –Two Stage Cooling
6	CN6 – Actuator & Aquastat
7	CN7 – Transformer
8	CN8 – Line Service Voltage
9	CN9 – PSC Motor Connection
10	CN10 – ECM Connection
11	ECM Fan Speed Adjustment
12	LED Diagnostics
13	Ground Connection

 W • Venture 24 V Wi-Fi Programmable

### Standard Features and Options, Cont'd.

Venture 24V,  
Wi-Fi Programmable

Basic 24V Digital  
7-Day Programmable and  
Non-Programmable Series

Premium 24V Digital  
7-Day Programmable/BACnet

### Standard Features and Options, Cont'd.

#### Supply Air Grilles

Unit Size	Nominal CFM	Nominal One-Inch Filter Size		
		HH & HP	HX	VE
06	600	14" x 14" (356 x 356)	15" x 14" (381 x 356)	15" x 15" (381 x 381)
08	800	19" x 14" (483 x 356)	20" x 14" (508 x 356)	20" x 15" (508 x 381)
10	1000	23" x 14" (584 x 356)	24" x 14" (610 x 356)	24" x 15" (610 x 381)
12	1200	28" x 14" (711 x 356)	29" x 14" (737 x 356)	29" x 15" (737 x 381)
14	1400	33" x 14" (838 x 356)	34" x 14" (864 x 356)	34" x 15" (864 x 381)
16	1600	38" x 14" (965 x 356)	39" x 14" (991 x 356)	39" x 15" (991 x 381)
18	1800	43" x 14" (1092 x 356)	44" x 14" (1118 x 356)	44" x 15" (1118 x 381)
20	2000	47" x 14" (1194 x 356)	48" x 14" (1219 x 356)	48" x 15" (1219 x 381)

#### Return Air Filter Grilles

Unit Size	Nominal CFM	Nominal One-Inch Filter Size		
		HH & HP	HX	VE
06	600	21" x 14" (533 x 356)	15" x 14" (381 x 356)	20" x 15" (508 x 381)
08	800	26" x 14" (660 x 356)	20" x 14" (508 x 356)	25" x 15" (635 x 381)
10	1000	30" x 14" (762 x 356)	24" x 14" (610 x 356)	29" x 15" (737 x 381)
12	1200	35" x 14" (889 x 356)	29" x 14" (737 x 356)	34" x 15" (864 x 381)
14	1400	40" x 14" (1016 x 356)	34" x 14" (864 x 356)	39" x 15" (991 x 381)
16	1600	45" x 14" (1143 x 356)	39" x 14" (991 x 356)	44" x 15" (1118 x 381)
18	1800	50" x 14" (1270 x 356)	44" x 14" (1118 x 356)	49" x 15" (1245 x 381)
20	2000	54" x 14" (1372 x 356)	48" x 14" (1219 x 356)	53" x 15" (1346 x 381)

NOTES: 1. Refer to Physical Data for actual unit return air opening dimensions.  
 2. Field-furnished duct transitions may be required.

Double-deflection, Aluminum-finish Supply Grille (Optional special shipped separate for models HHY, HPY, HXY, and VEY. Consult factory for details.)

Hinged Bar Type, Aluminum-finish Return Grille with Throwaway Filter (Standard offering for model HLY. Optional special shipped separate for models HHY, HPY, and HXY. Consult factory for details.)

Double-deflection, Integral Supply Grille Painted to Match Color of Unit (Standard offering for model HLY.)

### Piping Packages (Typical)

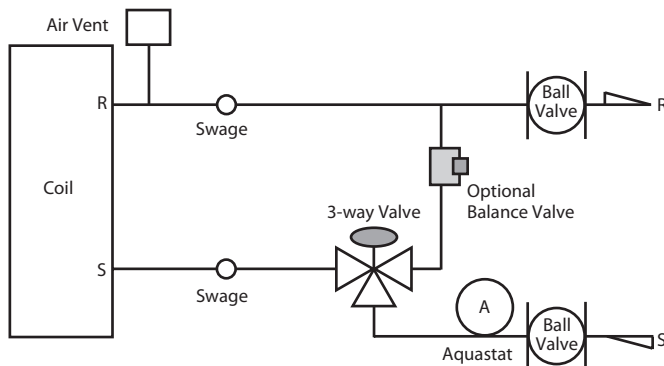

#### Two-way Motorized Control Valve

In a two-way motorized control valve package, the motor drives the valve open, and a spring returns the valve to a normally closed position. No water flows with the unit off. The standard supply connection from the coil will accept a swaged copper fitting for field brazing. As an option, this connection may be factory furnished with a union. When a swage is necessary, it becomes part of the valve package. The isolation, or ball, valve in the return piping is shipped loose for field installation.

#### Three-way Motorized Control Valve

In a three-way motorized control valve package, a diverting valve controls water flow to the coil. When the unit is off, water bypasses the coil and flows directly to the system return. A balancing valve may be specified in the bypass line to permit equal flow balancing.

#### Two-way Motorized Control Valve with Aquastat Bypass Line

In a two-way motorized control valve package, the motor drives the valve open, and a spring returns the valve to a normally closed position. No water flows through the coil with the unit off. The aquastat bypass line allows a small amount of water to flow from the supply to the return piping when the control valve is closed. The strap-on aquastat senses whether the flowing water is being chilled or heated and switches a contact closed to provide automatic summer/winter changeover (ACO) for the system. When a two-pipe cooling/heating system with optional auxiliary electric heat is desired, an additional aquastat is required.

- NOTES:**
1. Please note that project specifications for system pressure, pressure drop limitations and flow rate should be checked prior to selecting specific components or the valve package size
  2. The supply and return piping connections of the factory-provided valve package are either swaged for field brazing (standard) or union fitted (optional) for field connection to the coil.
  3. Consult IEC's Valve Packages and Piping Components manual or your local representative for detailed piping and valve application information. Factory-provided valve packages are assembled, brazed, wired electrically and dry-fit to the coil connections before shipping. Field brazing to the coil completes the installation. Some applications dictate shipping isolation valves loose.

# Hi-Performance Series
