Z1000 Family of Drives

YASKAWA

HVAC Building Automation Catalog

A Single Drive for all Your Building Automation Needs

The Z1000 variable-speed drive is designed for building automation applications such as fans, pumps, and cooling towers through 500 HP. The Z1000 features HVAC-specific application macros, an easy-to-read LCD keypad that provides Hand-Off-Auto interface, and a real time clock. These features make the Z1000 perfect for most building automation applications that require reliable motor control.

Pushing Expectations

Yaskawa America, Inc. has been building packages for the HVAC industry since 1988. Over that time, we have worked rigorously to evolve our products and exceed industry standards, while ensuring an exceptional customer experience.

Our latest offering for the HVAC industry, the Z1000 family of drives, pushes past the standard requirements to establish a new benchmark for expectations within the industry.

Yaskawa embraces the challenge of supplying an essential product into a growing and changing market. Customers of all types are demanding more flexibility, more control, more power, less downtime, and more packaging options. The Z1000 family of drives is able to address and exceed all of these expectations.

Preface

This catalog may describe trademarked equipment, which is the property of other companies. These trademarks are the property of the registered owner companies and may include the following:

APOGEE®, FLN is a registered trademark of Siemens Building Technologies, Inc.
APOGEE®, Anywhere™ is a trademark of Siemens Building Technologies, Inc.
BACnet is a trademark of the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE).
Metasys®, N2 is a trademark of Johnson Controls, Inc.
Modbus®, trademark of Schneider Automation, Inc.
Other Documents and Manuals are available to support special use or installation of this product. These documents may be provided with the product or upon request. Contact Yaskawa America, Inc. or visit www.yaskawa.com, as required.

Z1000 Specifications: 200 to 240 V and 380 to 480 V

The Z1000 variable-speed drive is engineered for use in HVAC building automation applications requiring reliable motor control.

The Z1000 features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy. Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  3 to 150 HP, 200 to 240 Vac
  3 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Motor preheat function
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Torque limiting: 30 to 180%
- Power loss ride through: 2 seconds
- Auto restart after power loss or resettable fault, selectable, programmable
- Serial communications loss detection
- Up/down floating point control capability
- Stationary motor auto-tuning
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 3 programmable multi-function output relays (Form A rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection

Service Conditions

- Input voltage:
  200 to 240 Vac, 380 to 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0
- Vibration: 9.81 m/s^2 (1 G) maximum at 10 to 20 Hz, 2.0 m/s^2 (0.2 G) at 20 Hz to 55 Hz
- Plenum mounting capable (IP20)
- RoHS Compliant

Design Features

- Built in 5% line impedance (3 to 100 HP @ 208V, 3 to 250 HP @ 480V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (3 to 100 HP @ 208V, 3 to 250 HP @ 480V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PI) Controls
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- Feedback signal low pass filter
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- VFD efficiency: 98% at full-speed; 96% at half-speed
- "S-curve" soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- No load detection (broken belt alert)
- One fixed "Fault" form C output relay (Rated 2 amps @ 250 Vac & 30 Vdc)
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- "Kinetic Energy Braking" (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions with a built-in copy feature
- Motor preheat function
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- "Bumpless" transfer between Hand and Auto modes
- Emergency override can be used as "smoke purge" function
- Fan failure detection and selectable drive action

Standards

- UL 508C (Power Conversion)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- UL 1995 (Plenum)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed; CE marked
- IBC 2012

Options

- LonWorks Interface
- EtherNet/IP
- Modbus TCP/IP

Z1000 Specifications: 500 to 600 V

The Z1000 variable-speed drive is engineered for use in HVAC building automation applications requiring reliable motor control.

The Z1000 features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings: 2 to 250 HP
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Motor preheat function
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1

Z1000 Model Selection 200 to 240 V

Z1000 Drives 3 to 150 HP, 200 to 240 V, 3-phase input, NEMA-1/IP20 enclosed or Protected Chassis/IP00.

Rated Input Voltage	Drive Model Number CIMR-ZU	Rated Output Current (Amps)	Nominal HP *1	Standard Enclosure
200 to 240 V 3-Phase	2A0011FAA	10.6	3	NEMA-1 / IP20
	2A0017FAA	16.7	5	
	2A0024FAA	24.2	7.5	
	2A0031FAA	30.8	10	
	2A0046FAA	46.2	15	
	2A0059FAA	59.4	20	
	2A0075FAA	74.8	25	
	2A0088FAA	88	30	
	2A0114FAA	114	40	
	2A0143FAA	143	50	
	2A0169FAA	169	60	
	2A0211FAA	211	75	
	2A0273FAA	273	100	
	2A0343AAA	343	125	Open-Type / IP00
	2A0396AAA	396	150	

*1. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 208 volts.

Z1000 Model Selection 380 to 480 V

Z1000 Drives 3 to 500 HP, 480 V, 3-phase input, NEMA-1/IP20 enclosed or Protected Chassis/IP00.

Rated Input Voltage	Drive Model Number CIMR-ZU	Rated Output Current (Amps)	Nominal HP *1	Standard Enclosure
380-480 V 3-Phase	4A0005FAA	4.8	3	NEMA-1 / IP20
	4A0008FAA	7.6	5	
	4A0011FAA	11	7.5	
	4A0014FAA	14	10	
	4A0021FAA	21	15	
	4A0027FAA	27	20	
	4A0034FAA	34	25	
	4A0040FAA	40	30	
	4A0052FAB	52	40	
	4A0052FAA	52	40	
	4A0065FAA	65	50	
	4A0077FAA	77	60

	4A0124FAA	124	100	
	4A0156FAA	156	125	
	4A0180FAA	180	150	
	4A0240FAA	240	200	
	4A0302FAA	302	250	
	4A0361AAA	361	300	Open-Type / IP00
	4A0414AAA	414	350	
	4A0480AAA	480	400	
	4A0590AAA	590	500	

*1. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 480 volts.

Z1000 Model Selection 500 to 600 V

Z1000 Drives 1 to 250 HP, 600 V, 3-phase input, NEMA-1/IP20 enclosed or Protected Chassis/IP00.

Rated Input Voltage	Rated Output Current (Amps)	Nominal HP *3	Standard Enclosure *1 *2
			Drive Model Number CIMR-ZU
500 to 600 V 3-Phase	2.7	1 & 2	5A0003FAA
	3.9	3	5A0004FAA
	6.1	5	5A0006FAA
	9	7.5	5A0009FAA
	11	10	5A0011FAA
	17.5	15	5A0017FAA
	22	20	5A0022FAA
	27	25	5A0027FAA
	32	30	5A0032FAA
	41	40	5A0041FAA
	52	50	5A0052FAA
	62	60	5A0062FAA
	77	75	5A0077FAA
	99	100	5A0099FAA
	125	125	5A0125AAA
	145	150	5A0145AAA
	192	200	5A0192AAA
	242	250	5A0242AAA

*1. Standard Enclosure can be conventionally mounted or heat sink external (kit required for models CIMR-ZU5A0032FAA and smaller).

*2. Only models ending in FAA (CIMR-ZU5A0099FAA and smaller) come standard with NEMA 1 End Cap Kits. Separately sold kits are available for larger models.

*3. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors. Also, listed power ratings assume three-phase input.

Z1000 Options

End Cap Kits NEMA 1

This option consists of a top and bottom cover to convert a protected IP00/Open Type drive to a IP20/NEMA 1, UL Type 1 enclosed unit. This option DOES NOT provide additional space for mounting auxiliary components (i.e., circuit breaker, input fuses, reactor, etc.).

Rated Input Voltage	Drive Model Number CIMR-ZU2A□□□□	Part Number
200 to 240 V 3-Phase	0343	EZZ021136E

*1. These ratings are already available as NEMA 1 (FAA) drives; the End Cap Kits for these ratings are shown here only for replacement purposes.

24 Vdc Control Power Unit

This option provides board-level component voltages for the Z1000 drive when provided with 24 Vdc from an external, customer-supplied source. It is used to maintain both drive control power and network communications (when utilized). Option kits for customer mounting:

Rated Input Voltage	Nominal HP	Drive Model Number CIMR-ZU	Control Power Unit Part Number
200 to 240 V 3-Phase	3 through 150	2A0011 through 2A0396	PS-A10LB
380 to 480 V 3-Phase	3 through 500	4A0005 through 4A0590	PS-A10HB
500 to 600 V 3-Phase	2 through 250	5A0003 through 5A0242	PS-A10HB

External Heatsink Kits

External Heatsink Kit: Allow drives to be mounted with the drive's heat sink external to the enclosure. Option kit for customer mounting. Available in either NEMA 1 or NEMA 12.

External Heatsink Kits NEMA 1 for 200 to 240 V Models

Control and Communication Options

These cards, cables, and devices add control functionality to the standard drive. Items are shipped loose, unmounted.

Digital Operator and Software

Model No.	Option Name	Description
UOP000016 (JVOP-183)	Digital Operator (LCD)	This option is the standard digital operator found on the drive. This option is only required if the original digital operator is lost or damaged. If used as a remote operator, the standard digital operator may be used, but then requires Installation Set A (EZZ020642A) for panel or door mounting and Remote Operator Cable (UWR0051 or UWR0052), each sold separately. Features include: • LCD keypad display, 5 lines x 16 characters, backlit • 7 languages • Copy function • Mounts to RJ-45 keypad port
EZZ020642A	LCD/LED Keypad Installation Set A (Remote Operator Mounting Bracket Kit)	This is a bracket to which the LCD Digital Remote Operator (JVOP-183) attaches, and has (4) threaded holes and screws to attach to the cover of an enclosure. The kit contains (2) screws to mount the Operator to the bracket and (4) screws to attach the bracket to the enclosure.
EZZ020642B	LCD/LED Keypad Installation Set B (Remote Operator Mounting Bracket Kit)	Contains a similar bracket that the keypad attaches to and has non-threaded holes for mounting to an enclosure that has the screws attached to the enclosure already. The kit contains (2) screws to mount the keypad to the bracket and (4) nuts to attach the bracket to the customer supplied screws attached to the enclosure.
UUX000922	Keypad Adapter Kit	This kit can be used when a “new” Z1000 keypad is replacing an “old style” key pad used with E7-based Z1000 drives. This kit will allow enclosure door mounted key pad to be upgraded from E7 style to the Z1000 style digital key pad.
UWR0051	Operator Cable, Remote (1 meter)	These cables are used to connect the Remote Digital Operator (JVOP-18□). They are available in one (1) or three (3) meter lengths.
UWR0052	Operator Cable, Remote (3 meter)	
UUX000526 (Blank Membrane)	Operator Kits, NEMA Type 3R/4X	This option is used to extend an LCD or LED Digital Remote Operator to the wall of a separately specified, oversized UL Type 3R, 4, 4X, or 12 enclosure (IPX6 environment). Item includes a faceplate bezel with digital operator brackets and membrane to cover the operator cutout in the enclosure door, a 3-foot cable, a 10-foot cable, and a 1:1 template for cutting the necessary cutouts in the enclosure. Keypad can be removed after kit installation. Designed for use with **1000 series Digital Remote Operators (sold separately)**. Connects to RJ-45 port and mounts to enclosure wall.
UUX000527 (Yaskawa Logo Membrane)		
UNP00233-3 (Yaskawa Logo)	Overlay, Keypad, Self-adhesive	This membrane is used to cover the operator cutout in the enclosure door to which the keypad has been remotely mounted.
UNP00233-5 (Blank)		
UOP000017 (Yaskawa Logo Faceplate Membrane)	UL Rated Remote Outdoor Operator/ Mounting Kit	UL Rated Remote Outdoor Operator / Mounting Kit. This option provides all you will need to remotely mount the drive's Digital Operator to the door/wall of a separately specified, oversized UL Type 1, 3R, 4, 4X, or 12 enclosure (IPX6 environment). This kit includes: One JVOP-183R Digital Operator providing RTC, HOA, and outdoor rated LCD display, a faceplate bezel with digital operator brackets and membrane to cover the operator cutout in the enclosure door, a 3-foot cable, a 10-foot cable, and a 1:1 template for cutting the necessary cutouts in the enclosure. Mounting hardware is included. Keypad can be removed after kit installation. Connects to RJ-45 port and mounts to enclosure wall.
UOP000019 (Blank Faceplate Membrane)		
SW.DW.40	DriveWizard® HVAC Software	This optional software package allows upload and download of parameters via PC for data storage and for programming multiple drives. The software also includes graphing and monitoring tools. It is a Windows-based program designed to make startup, commissioning, and troubleshooting the drive as simple as possible. Refer to our website at **www.yaskawa.com** to download the software, and for more information, including minimum system requirements and cable information to interface a PC to the drive.
UWR-0638	USB Interface Cable	This 10-foot male USB-A to male USB-B cable provides a USB-to-USB connection from PC to the drive.
UWR-01076-1	Flash Write Cable	This 6-foot cable connects a PC’s 9-pin serial port to the drive’s keypad port for updating the drive’s firmware, flashing with custom firmware, or updating a network communication option board. It is used with the Flash Tool feature of the DriveWizard® HVAC software.
UWR00468-2	PC Interface Cable	This 6-foot cable interconnects the drive keypad port to the 9-pin communication port on a PC. This cable is used in conjunction with DriveWizard® HVAC software.

Support Tools

Model No.	Option Name	Description
JVOP-181	USB Copy Unit (Y-Stick)	This option allows the drive to connect to the USB port on a PC. It can read, copy and verify drive parameter settings from one drive to another like drive. The unit plugs into the RJ-45 port on the front of the digital operator. Refer to our website at www.yaskawa.com to download the software.
No Model Number	CopyUnitManager Software for USB Copy Unit (Y-Stick)	This option allows the user to transfer and save parameter files from the Copy Unit (JVOP-181), sold separately, to a PC and vice versa. Refer to our website at www.yaskawa.com to download the software.

Network Communications

Model No.	Option Name	Description
SI-W3	LonWorks	This option is compatible with the LonMark Interoperability Association and complies with the Functional Profile for a Variable Frequency Motor Drive. Network connectivity is facilitated by either a Phoenix-style screw termination or RJ-45 connector. Mounts at option connector CN5-A.
SI-EN3	EtherNet/IP	This option complies with the EtherNet/IP protocol specification, and allows for communication over 10/100 Mbps Ethernet networks. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. The IP address can be set from the drive keypad or from the network. All parameters, diagnostics, and operational commands are accessible via EtherNet/IP. The web interface allows management of diagnostic information through a standard web browser. The embedded web pages include the main page, drive status page, network monitor page, and documentation page. Mounts at option connector CN5-A.
SI-EM3	Modbus TCP/IP	This option complies with the Modbus TCP/IP protocol specification. This allows for Modbus communication over 10/100 Mbps Ethernet networks. This option has the ability to configure the IP Address from a user-specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics, and operational commands are accessible via Modbus TCP/IP. This option supports up to 10 simultaneous PLC/PC connections. Mounts at option connector CN5-A.
SI-EN3D	EtherNet/IP with device level ring (DLR)	This option complies with the EtherNet/IP protocol specification. This allows for communication over 10/100 Mbps Ethernet networks. The dual port hardware provides the user the choice of wiring in a star, line or ring configuration. For a ring configuration, device level ring (DLR) is available on this option card. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics and operational commands are accessible via EtherNet/IP. Auto-tuning the motor is also possible through this option using the DriveWizard PC program. Mounts at option connector CN5-A.
SI-EM3D	Modbus TCP/IP – Dual Port	This option complies with the Modbus TCP/IP protocol specification. This allows for Modbus communication over 10/100 Mbps Ethernet networks. The dual port hardware provides the user the choice of wiring in a star, line or ring configuration. For a ring configuration, rapid spanning tree protocol (RSTP) is available on this option card. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics and operational commands are accessible via Modbus TCP/IP. Auto-tuning the motor is also possible through this option using the DriveWizard PC program. This option supports up to 10 simultaneous PLC/PC connections. Mounts at option connector CN5-A.

*1. This data represents the average drive weight only, not shipping weight.

*2. The drawings are available in .pdf and .dwg formats. For additional formats, click on the Mechanical Drawings link available on the Z1000 Product Details page at www.yaskawa.com.

*3. Protected chassis models can be converted to NEMA Type 1 by adding top and bottom covers. Add-on kit is required. Consult factory for add-on kit.

Bypass Drive NEMA Type 1 (Z1B1)

Specifications: 208 and 480 V NEMA Type 1 (Z1B1)

The Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control. The package provides a Z1000 drive in a NEMA 1 (UL Type 1) enclosure with a 2-contactor style bypass to allow motor operation from the drive or across the line.

The bypass features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy. Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  1 to150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque

Bypass Features

- Bypass and Drive output contactors
- Lockable Main Input disconnect switch
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings and harmonic reduction mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Built in 5% line impedance (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed
- BTL certified

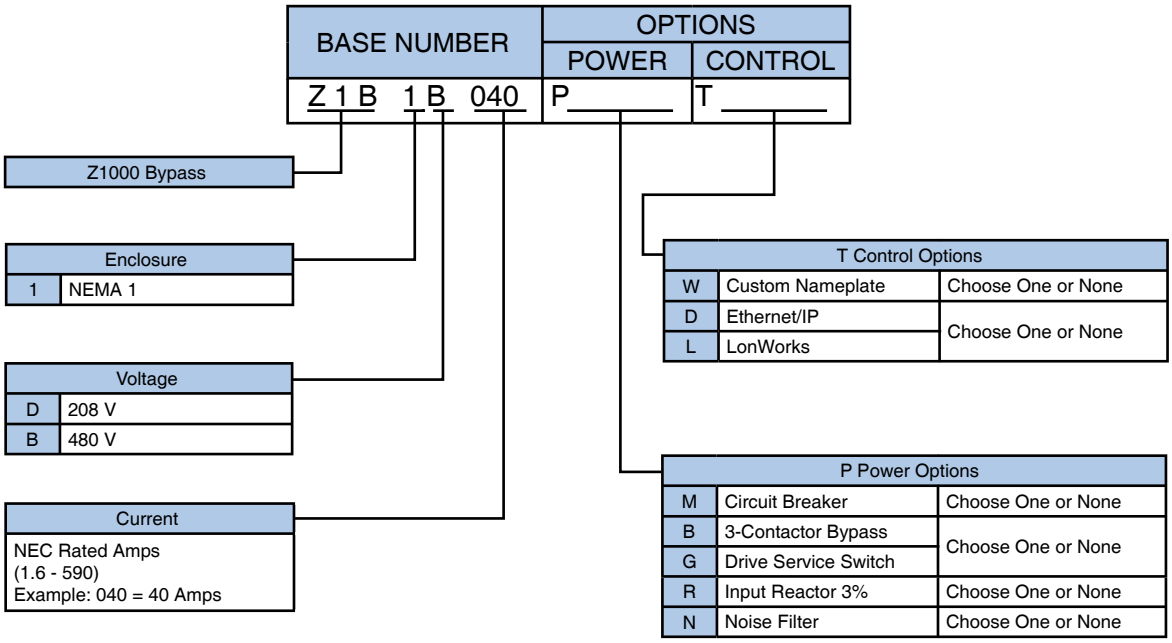
Options

- Circuit Breaker (100 kAIC, additional fuses not required)
- 3-Contactor Bypass
- Drive Service Switch
- Input Reactor
- Noise Filter
- Custom Nameplate
- EtherNet/IP
- LonWorks
- Modbus TCP/IP

Model Number Configuration (Z1B1)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1B1)

Enclosure Options

NEMA 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Bypass Drive NEMA Type 1 (Z1B1)

Power Options

Circuit Breaker	(M)	The standard configuration provides an input disconnect switch with a padlockable operator mechanism. This disconnect switch DOES NOT provide motor short circuit protection. If motor short circuit protection is desired in the bypass enclosure, select option (M), which provides a circuit breaker (100 kAIC) with a padlockable operator mechanism.
Drive Input Circuit	(B, G)	The standard configuration does not include any protection or disconnecting means specifically for the drive. For a 3-contactor bypass that removes power from the drive, select option (B). For an input disconnect switch that removes power from the drive, select option (G).
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor, (For 300 to 500 HP @ 480 volts and 125 to150 HP @ 208 volts only.)
Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1B1)

Z1000 Bypass Drive NEMA Type 12 (Z1BB)

Specifications: 208 and 480 V NEMA Type 12 (Z1BB)

The Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control. The package provides a Z1000 drive in a NEMA 12 (UL Type 12) enclosure with a 2-contactor style bypass to allow motor operation from the drive or across the line.

The bypass features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  1 to150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque

Bypass Features

- Bypass and Drive output contactors
- Lockable Main Input disconnect switch
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings and harmonic reduction mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Built in 5% line impedance (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed
- BTL certified

Options

- Circuit Breaker (100 kAIC, additional fuses not required)
- Input Fuses
- 3-Contactor Bypass
- Drive Service Switch
- Two Motor “AND”
- Two Motor “OR”
- Output Reactor
- Input Reactor
- Noise Filter
- Custom Nameplate
- EtherNet/IP
- LonWorks
- Modbus TCP/IP

Z1000 Bypass Drive NEMA Type 12 (Z1BB)

Model Number Configuration (Z1BB)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.

BASE NUMBER	OPTIONS	
	POWER	CONTROL
Z 1 B B B 040	P_____	T_____

Z1000 Bypass

Enclosure	
B	NEMA 12

Voltage	
D	208 V
B	480 V

Current
NEC Rated Amps (1.6 - 590) Example: 040 = 40 Amps

T Control Options		
W	Custom Nameplate	Choose One or None
D	Ethernet/IP	Choose One or None
L	LonWorks	

P Power Options		
M	Circuit Breaker	Choose One or None
F	Input Fuses	Choose One or None
B	3-Contactor Bypass	Choose One or None
G	Drive Service Switch	
A	Two Motor “AND”	Choose One or None
Y	Two Motor “OR”	
K	Output Reactor	
R	Input Reactor	
N	Cap Filter	Choose One or None

Options (Z1BB)

Enclosure Options

NEMA 12	(B)	The drive and Configured options are provided in a NEMA Type 12 (1) ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Motor Control	(A, Y)	Simultaneous control of two identical motors is possible with the 'AND' configuration, option (A). Either one of two motors can be controlled with the 'OR' configuration, option (Y).
Circuit Breaker	(M)	The standard configuration provides an input disconnect switch with a padlockable operator mechanism. This disconnect switch DOES NOT provide motor short circuit protection. If motor short circuit protection is desired in the bypass enclosure, select option (M), which provides a circuit breaker (100 kAIC) with a padlockable operator mechanism.

Input Fuses	(F)	Option (F) provides drive input fuses for increased drive input over current protection.
Drive Input Circuit	(B, G)	The standard configuration does not include any protection or disconnecting means specifically for the drive. For a 3-contactor bypass that removes power from the drive, select option (B). For an input disconnect switch that removes power from the drive, select option (G).
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor.
Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Bypass Drive NEMA Type 3R (Z1B3)

Specifications: 208 and 480 V NEMA Type 3R (Z1B3)

The Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control.

The bypass package provides a Z1000 drive in a NEMA 3R (UL Type 3R) enclosure and lockable main input circuit breaker with a 3-contactor style bypass to allow motor operation from the drive or across the line.

The bypass features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  1 to150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque

Bypass Features

- Bypass and Drive output contactors
- 3-Contactor Bypass
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings and harmonic reduction mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 3R (IP14): -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Built in 5% line impedance (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 - 100 HP @ 208 V, 1 - 250 HP @ 480 V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)

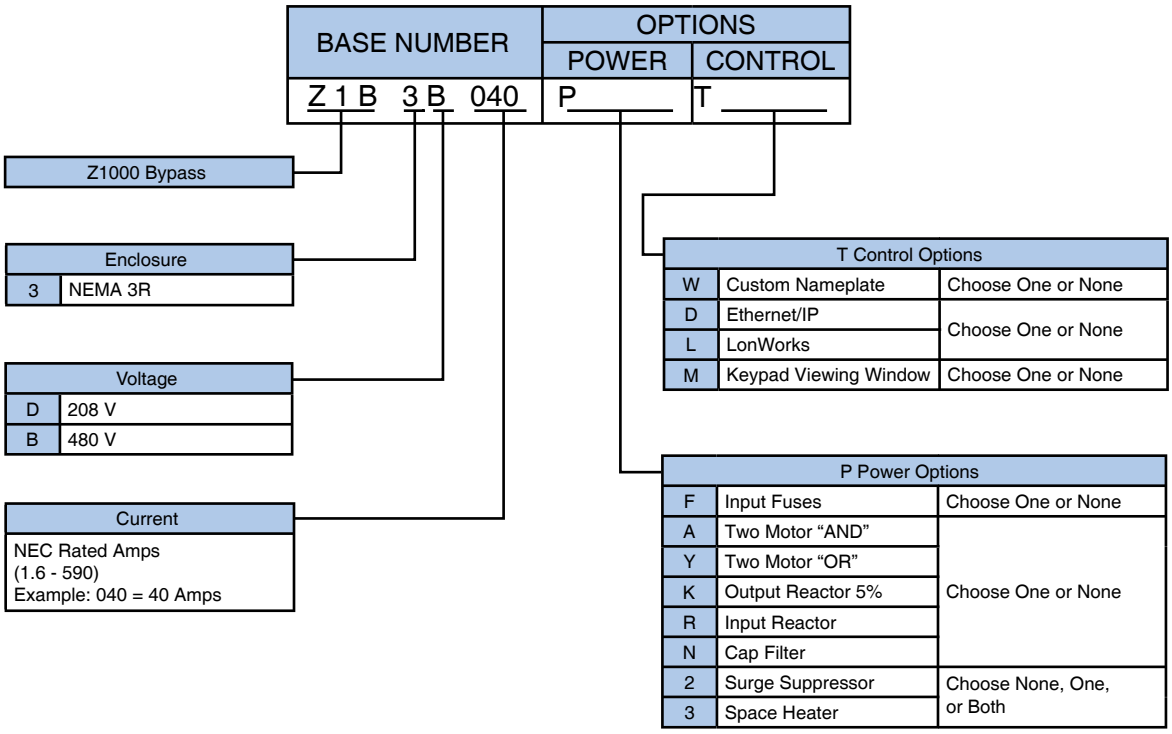
- Input Filter
- Surge Suppressor
- Space Heater
- Custom Nameplate
- EtherNet/IP
- LonWorks
- Keypad Viewing Window

Model Number Configuration (Z1B3)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1B3)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.
Freestanding Leg Kit NEMA 3R	UUX000923	**12 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.
	UUX000924	**30 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.

Bypass Drive NEMA Type 3R (Z1B3)

Power Options

Motor Control	(A, Y)	Simultaneous control of two identical motors is possible with the 'AND' configuration, option (A). Either one of two motors can be controlled with the 'OR' configuration, option (Y).
Input Fuses	(F)	Option (F) provides drive input fuses for increased drive input over current protection.
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor.
Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.
Surge Suppressor	(2)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Z1000 Configured Drive NEMA Type 1 (Z1C1)

Specifications: 208 and 480 V NEMA Type 1 (Z1C1)

The Z1000 Configured package provides a Z1000 in a NEMA 1 enclosure, with input disconnect switch and space for several commonly used option, such as reactors, fuses, circuit breakers, etc. The Z1000 Configured has been designed for flexibility in providing the features and options commonly specified by facility designers.

The Z1000 Drive is a variable torque AC drive, designed specifically for HVAC applications in building automation. A new benchmark for size, cost, performance, benefits, and quality, the Z1000 includes numerous built-in features such as Network Communications, H/O/A, PI control, and energy-savings functions.
The Z1000 has embedded communications for the popular building automation protocols BACnet, Modbus, Siemens APOGEE, and Johnson Controls Metasys. Optional LonWorks or EtherNet/IP interface cards are also available.

Performance Features

- VT Ratings:
  1 to 150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Motor preheat function
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Controlled speed range 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Power loss ride through: 2 seconds
- Torque limiting: 30 to 180%
- Auto restart after power loss or resettable fault, selectable, programmable
- Serial communications loss detection
- Up/down floating point control capability
- Stationary motor auto-tuning
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 Vdc (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- Adjustable carrier frequency, from 1 kHz to 12.5 kHz
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 3 programmable multi-function output relays (Form A rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0

Design Features

- Lockable main input disconnect switch
- Built in 5% line impedance (1 to 100 HP @ 208V, 3 to 250 HP @ 480V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 to 100 HP @ 208V, 3 to 250 HP @ 480V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PI) Controls
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- VFD efficiency: 98% at full-speed; 96% at half-speed
- Diagnostic fault indication
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- No load detection (broken belt alert)
- One fixed “Fault” form C output relay (Rated 2 amps @ 250 Vac & 30 Vdc)
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions with a built-in copy feature
- Motor preheat function
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD

Options

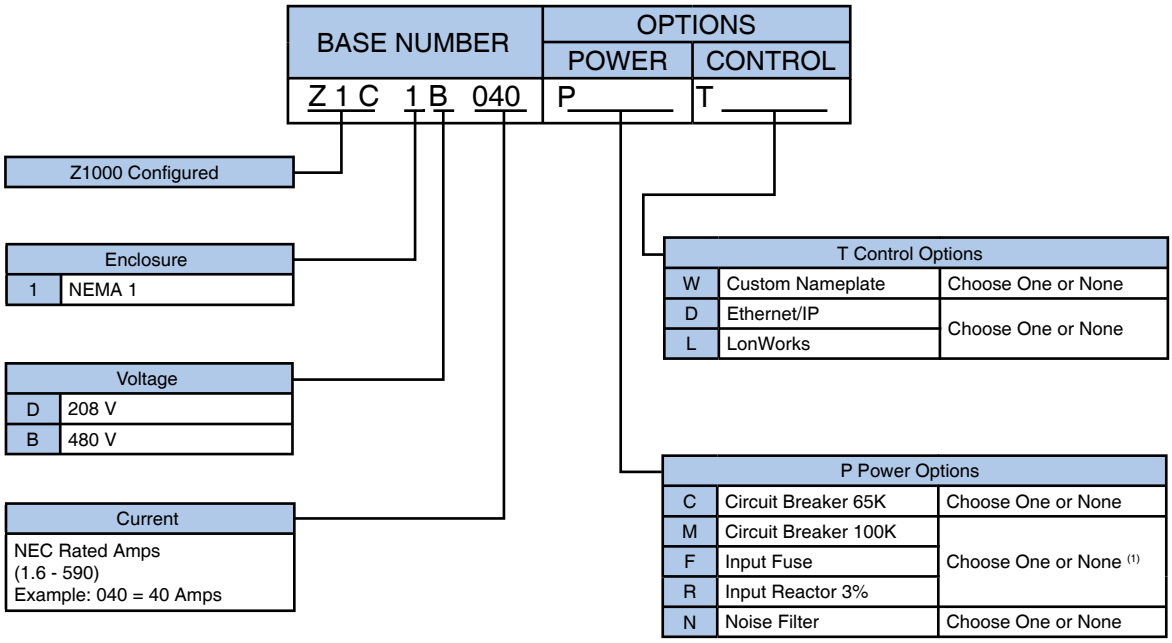
- Circuit Breaker (65 kAIC or 100 kAIC)
- Input Fuses
- Input Reactor
- Input Filter
- Custom Nameplate
- EtherNet/IP
- LonWorks

Z1000 Configured Drive NEMA Type 1 (Z1C1)

Model Number Configuration (Z1C1)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1C1)

Enclosure Options

NEMA 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Circuit Breaker	(C, M)	The standard configuration provides a line input disconnect switch but no branch short circuit protection. Circuit breaker options are available. Option (C) is a 65 kAIC rated circuit breaker and option (M) is a 100 kAIC rated circuit breaker. When option (C) is specified, the configured drive package will be rated at 65 kAIC. When option (M) is specified, the configured drive package will be rated at 100 kAIC.
Input Fuses	(F)	Option (F) provides drive input fuses for increased drive input over current protection.
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor. **Note:** Consult factory for availability on certain models. Certain capacities will not accommodate the R option.
Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1C1)

Configured Drive NEMA Type 12 (Z1CB)

Specifications: 208 and 480 V NEMA Type 12 (Z1CB)

The Z1000 NEMA 12 Configured drive is engineered to allow flexibility when providing the features and options commonly specified by facility designers.

The configured package provides a Z1000 drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto LCD keypad with an input disconnect switch and space for several power options inside a NEMA 12 (UL Type 12) enclosure.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  1 to 150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Motor preheat function
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Controlled speed range 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Power loss ride through: 2 seconds
- Torque limiting: 30 to 180%
- Auto restart after power loss or resettable fault, selectable, programmable
- Serial communications loss detection
- Up/down floating point control capability
- Stationary motor auto-tuning

Design Features

- Lockable main input disconnect switch
- Built in 5% line impedance (1 to 100 HP @ 208V, 1 to 250 HP @ 480V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 to 100 HP @ 208V, 3 to 250 HP @ 480V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PI) Controls
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 Vdc (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- Adjustable carrier frequency, from 1 kHz to 12.5 kHz
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 3 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection
- VFD efficiency: 98% at full-speed; 96% at half-speed
- Diagnostic fault indication
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- No load detection (broken belt alert)
- One fixed “Fault” form C output relay (Rated 2 amps @ 250 Vac & 30 Vdc)
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions with a built-in copy feature
- Motor preheat function
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20): -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed; CE marked
- BTL listed
- IBC-2012

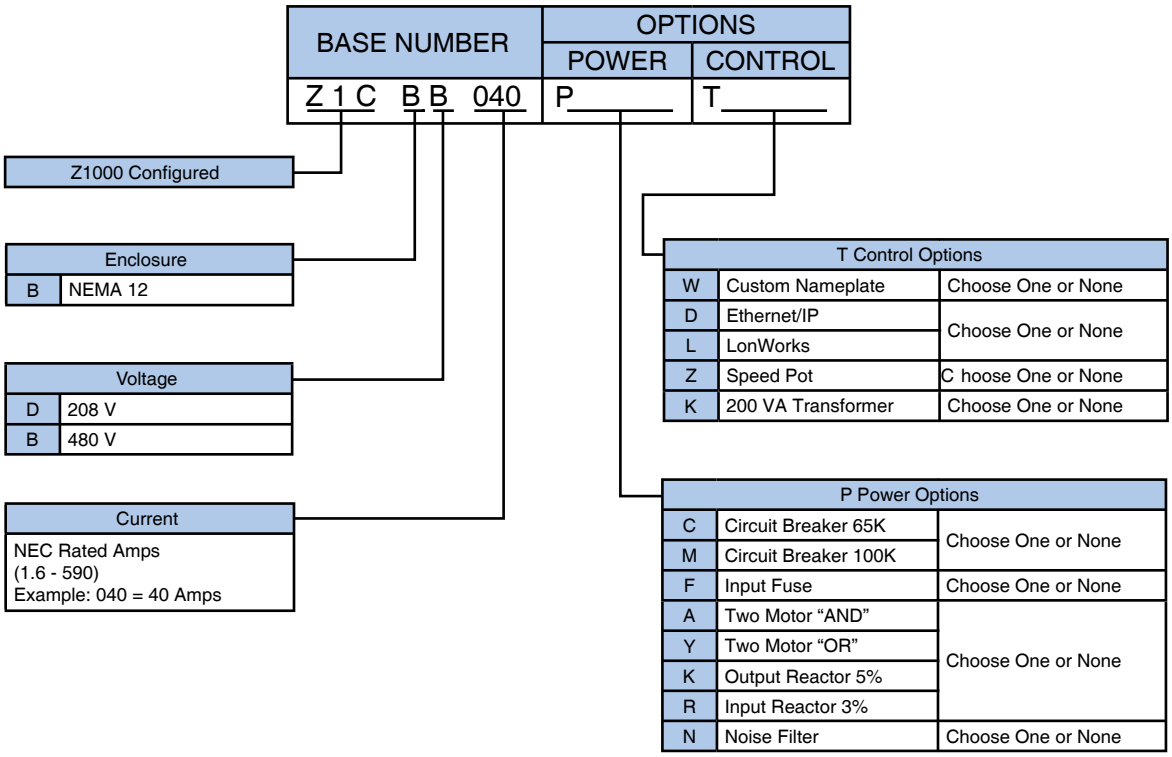
Options

- Circuit Breaker (65 kAIC or 100 kAIC)
- Input Fuses
- Two Motor “AND”
- Two Motor “OR”
- Output Reactor
- Input Reactor
- Input Filter
- Custom Nameplate
- EtherNet/IP
- LonWorks

Model Number Configuration (Z1CB)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1CB)

Enclosure Options

NEMA 12	(B)	The drive and Configured options are provided in a NEMA Type 12 (1) ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Configured Drive NEMA Type 12 (Z1CB)

Power Options

Motor Control	(A, Y)	Simultaneous control of two identical motors is possible with the 'AND' configuration, option (A). Either one of two motors can be controlled with the 'OR' configuration, option (Y).
Circuit Breaker	(C, M)	The standard configuration provides a line input disconnect switch but no branch short circuit protection. Circuit breaker options are available. Option (C) is a 65 kAIC rated circuit breaker and option (M) is a 100 kAIC rated circuit breaker. When option (C) is specified, the configured drive package will be rated at 65 kAIC. When option (M) is specified, the configured drive package will be rated at 100 kAIC.
Input Fuses	(F)	Option (F) provides drive input fuses for increased drive input over current protection.
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor.
Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Configured Drive NEMA Type 3R (Z1C3)

Specifications: 208 and 480 V NEMA Type 3R (Z1C3)

The Z1000 NEMA 3R Configured drive is engineered to allow flexibility when providing the features and options commonly specified by facility designers.

The configured package provides a Z1000 drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto LCD keypad with an input disconnect switch and space for several power options inside a NEMA 3R (UL Type 3R) enclosure.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  1 to 150 HP, 208 Vac
  1 to 500 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Motor preheat function
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Controlled speed range 40:1
- Power loss ride through: 2 seconds
- Torque limiting: 30 to 180%
- Auto restart after power loss or resettable fault, selectable, programmable
- Serial communications loss detection
- Up/down floating point control capability
- Stationary motor auto-tuning

Design Features

- Lockable main input disconnect switch
- Built in 5% line impedance (1 to 100 HP @ 208V, 1 to 250 HP @ 480V)
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2) (1 to 100 HP @ 208V, 1- 250 HP @ 480V)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PI) Controls
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 Vdc (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- Adjustable carrier frequency, from 1 kHz to 12.5 kHz
- Programmable security code
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 3 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection
- Input and output terminal status indication
- VFD efficiency: 98% at full-speed; 96% at half-speed
- Diagnostic fault indication
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- No load detection (broken belt alert)
- One fixed “Fault” form C output relay (Rated 2 amps @ 250 Vac & 30 Vdc)
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions with a built-in copy feature
- Motor preheat function
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Service Conditions

- Input voltage:
  208 Vac, 480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 3R: -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature:
  -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed; CE marked
- BTL listed

Options

- Circuit Breaker (65 kAIC or 100 kAIC)
- Input Fuses
- Two Motor “AND”
- Two Motor “OR”
- Output Reactor
- Input Reactor
- Input Filter
- Surge Suppressor
- Space Heater
- Custom Nameplate
- EtherNet/IP
- LonWorks
- Keypad Viewing Window

Configured Drive NEMA Type 3R (Z1C3)

Model Number Configuration (Z1C3)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.

BASE NUMBER	OPTIONS	
	POWER	CONTROL
Z 1 C 3 B 040	P_____	T_____

Z1000 Configured

Enclosure

3	NEMA 3R

Voltage

D	208 V
B	480 V

Current

NEC Rated Amps
(1.6 - 590)
Example: 040 = 40 Amps

T Control Options

W	Custom Nameplate	Choose One or None
D	Ethernet/IP	Choose One or None
L	LonWorks	
M	Keypad Viewing Window	Choose One or None
Z	Speed Pot	Choose One or None
K	200 VA Transformer	Choose One or None

P Power Options

C	Circuit Breaker 65K	Choose One or None
M	Circuit Breaker 100K	
F	Input Fuse	Choose One or None
A	Two Motor “AND”	Choose One or None
Y	Two Motor “OR”	
K	Output Reactor 5%	
R	Input Reactor 3%	
N	Noise Filter	Choose One or None
2	Surge Suppressor	Choose None, Any, or All
3	Space Heater	

Options (Z1C3)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.
Freestanding Leg Kit NEMA 3R	UUX000923	**12 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.
	UUX000924	**30 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.

Power Options

Motor Control	(A, Y)	Simultaneous control of two identical motors is possible with the 'AND' configuration, option (A). Either one of two motors can be controlled with the 'OR' configuration, option (Y).
Circuit Breaker	(C, M)	The standard configuration provides a line input disconnect switch but no branch short circuit protection. Circuit breaker options are available. Option (C) is a 65 kAIC rated circuit breaker and option (M) is a 100 kAIC rated circuit breaker. When option (C) is specified, the configured drive package will be rated at 65 kAIC. When option (M) is specified, the configured drive package will be rated at 100 kAIC.
Input Fuses	(F)	Option (F) provides drive input fuses for increased drive input over current protection.
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Input Reactor	(R)	The standard configuration does not provide any additional AC line impedance. Option (R) can be selected to add a 3% AC line input reactor.

Configured Drive NEMA Type 3R (Z1C3)

Input Filter	(N)	The standard configuration for 125 to 150 HP @ 208V and for 300 to 500 HP @ 480V does not include a RFI filter. The cap filter, option (N), is a passive delta-wye capacitive network.
Surge Suppressor	(2)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Specifications: 480 V NEMA Type 1 (Z1R1)

The Z1000 Redundant Drive Package is engineered for use in critical HVAC building automation applications that require continuous reliable motor control.

The redundant drive package provides two Z1000 drives containing HVAC application-specific software macros and a real time clocks in a NEMA 1 (UL Type 1) enclosure to ensure uninterrupted operation in the event of drive fault.

The redundant drive package features a main input disconnect switch, semiconductor fuses for each drive, single input/output wiring points, a single control wiring point, two door-mounted keypads, a selectable Manual or Auto Transfer switch, an H/O/A switch, and an integral damper control circuit.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings: 5 - 250 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 3 programmable multi-function output relays (Form A rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Overtorque/undertorque detection

Redundant Package Features

- Standard Lockable Main Input Disconnect Switch
- 115 Vac control transformer, fused
- Semiconductor Fuses for each VFD
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable Manual or Auto Transfer
- Drive A-Auto-Drive B switch
- Hand-Off-Auto switch
- Single input/output wiring points
- Single control wiring point
- Two door mounted keypads

Service Conditions

- Input voltage:
  480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- "S-curve" soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- "Kinetic Energy Braking" (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- "Bumpless" transfer between Hand and Auto modes
- Emergency override can be used as "smoke purge" function
- Fan failure detection and selectable drive action
- Selectable energy savings mode

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed
- BTL certified

Embedded Serial Communication Protocols

- BACnet MSTP
- Modbus/Memobus
- Siemens Apogee
- Johnson Controls Metasys

Communication Options

- EtherNet/IP
- LonWorks Interface

Power Options

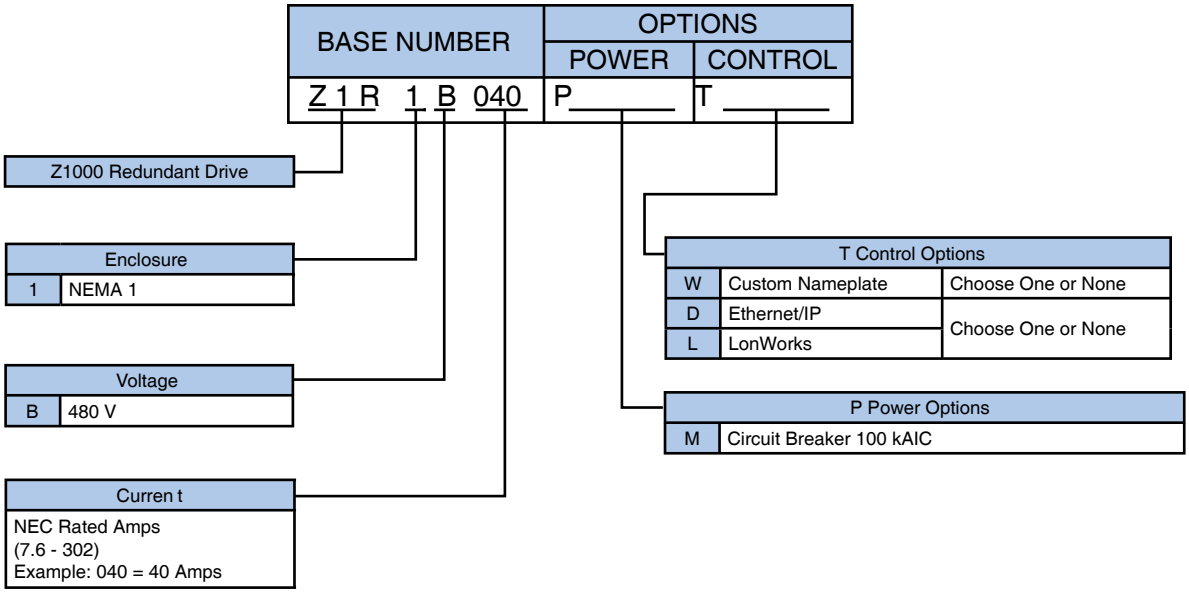
- Optional Lockable Main Input Circuit Breaker with 100 kAIC panel rating

Redundant Drive Package NEMA Type 1 (Z1R1)

Model Number Configuration (Z1R1)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1R1)

Enclosure Options

NEMA 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Circuit Breaker	(M)	The standard configuration provides a line input disconnect switch but no branch short circuit protection. Circuit breaker options are available. Option (M) is a 100 kAIC rated circuit breaker. When option (M) is specified, the drive package will be rated at 100 kAIC.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board. *1
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board. *1
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

*1. Two (2) network control options, one option installed on each of the two drives within the redundant drive package.

Model Selection (Z1R1)

Rated Input Voltage	Rated Output Current (Amps)	Redundant Drive Package Model No. Z1R1B□□□	Nominal HP *2	Circuit Breaker (100 kAIC)	Dimensions (in)			Approximate Weight (lb)

12-Pulse Bypass Drive NEMA Type 1 (Z1B1J)

Specifications: 480 V NEMA Type 1 (Z1B1J)

The 12-Pulse Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control and reduced harmonic distortion.

The bypass package provides a Z1000 drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto keypad inside a NEMA 1 (UL Type 1) enclosure and a 3-contactor style bypass to allow motor operation from the drive or across the line.

The design also matches an isolation transformer with a tuned input reactor to provide a phase shift that reduces harmonic distortion for cleaner power.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings: 7.5 to 250 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection

Bypass Features

- Input, Output and Bypass Contactors
- Lockable Main Input Circuit Breaker with 100 kAIC panel rating
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Integral 12-Pulse Design
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- IEC 61800-5-1 (LVD)
- EN 61800-3
- IEC 529
- IEEE C62.41
- UL, cUL listed
- BTL certified

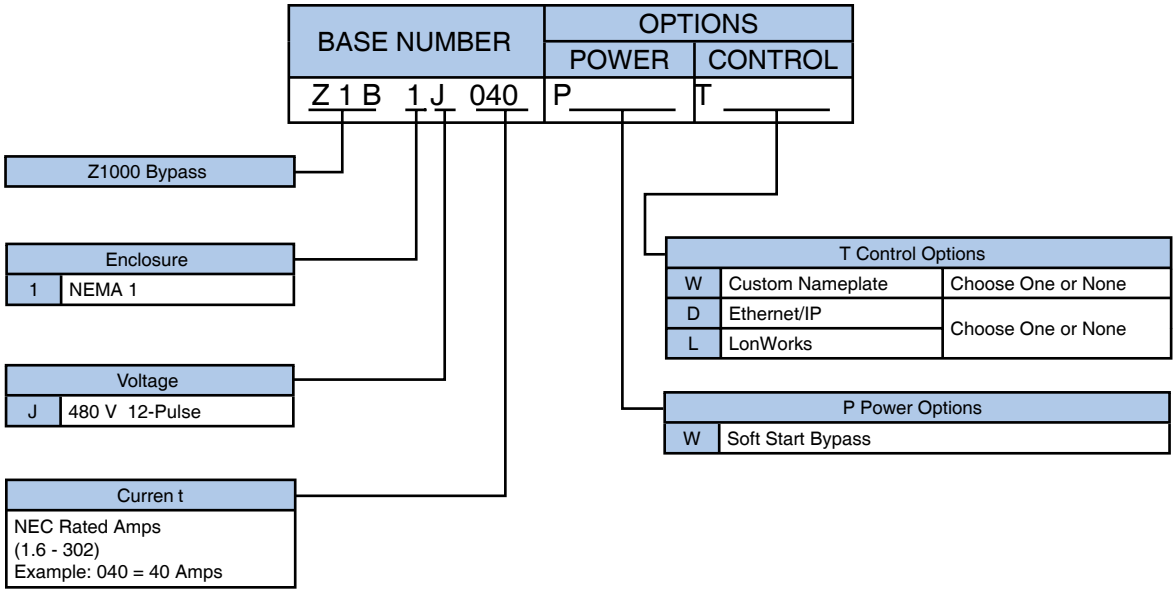
Options

- Soft Start Bypass
- EtherNet/IP
- LonWorks

Model Number Configuration (Z1B1J)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1B1J)

Enclosure Options

NEMA 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Soft Start Bypass	(W)	Provides a solid-state adjustable soft starter for use when switching to bypass mode. Option (W) provides a solid-state soft-starter with adjustable ramp to reduce mechanical system stress typically associated with across-the-line bypass motor starts. Select option (W) if the application cannot tolerate the mechanical load stress caused by across-the-line bypass motor starts.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.

Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1B1J)

480 V Models and Power Options

12-Pulse Bypass Drive NEMA Type 3R (Z1B3J)

Specifications: 480 V NEMA Type 3R (Z1B3J)

The 12-Pulse Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control and reduced harmonic distortion.

The bypass package provides a Z1000 drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto keypad inside a NEMA 3R (UL Type 3R) enclosure and lockable main input circuit breaker with a 3-contactor style bypass to allow motor operation from the drive or across the line.

The design also matches an isolation transformer with a tuned input reactor to provide a phase shift that reduces harmonic distortion for cleaner power.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings: 7.5 to 250 HP, 480 volt only.
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status Contactor
  - Control for External Bypass
  - Overtorque/undertorque detection

Bypass Features

- Input, Output and Bypass Contactors
- Lockable Main Input Circuit Breaker with 100 kAIC panel rating
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 3R: -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing

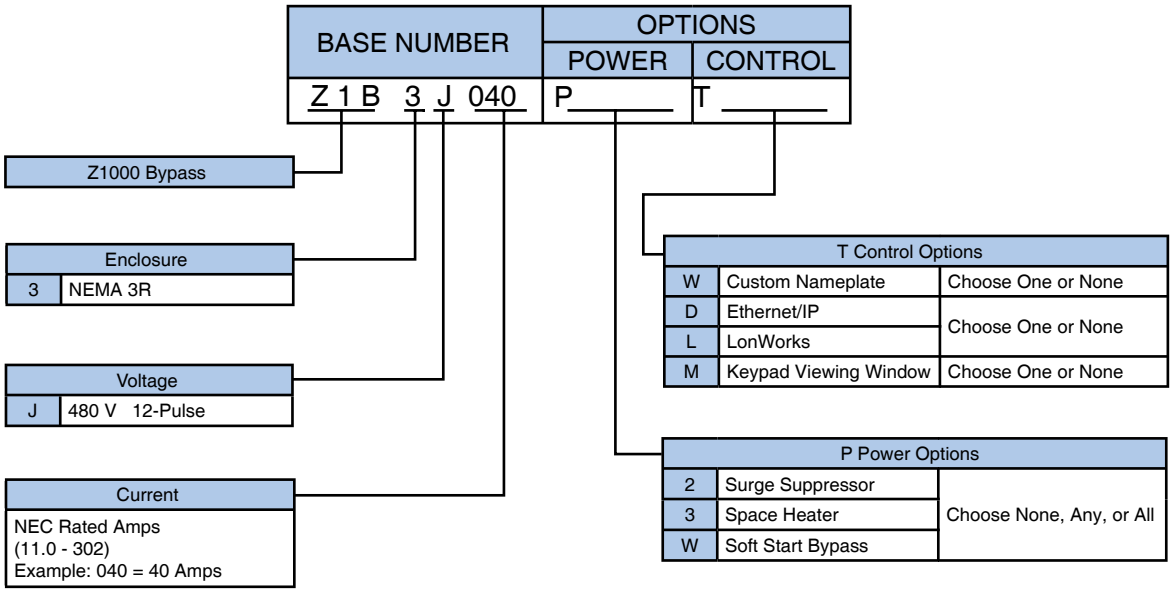
12-Pulse Bypass Drive NEMA Type 3R (Z1B3J)

Model Number Configuration (Z1B3J)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1B3J)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Surge Suppressor	(2)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.
Soft Start Bypass	(W)	Provides a solid-state adjustable soft starter for use when switching to bypass mode. Option (W) provides a solid-state soft-starter with adjustable ramp to reduce mechanical system stress typically associated with across-the-line bypass motor starts. Select option (W) if the application cannot tolerate the mechanical load stress caused by across-the-line bypass motor starts.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

- LonWorks

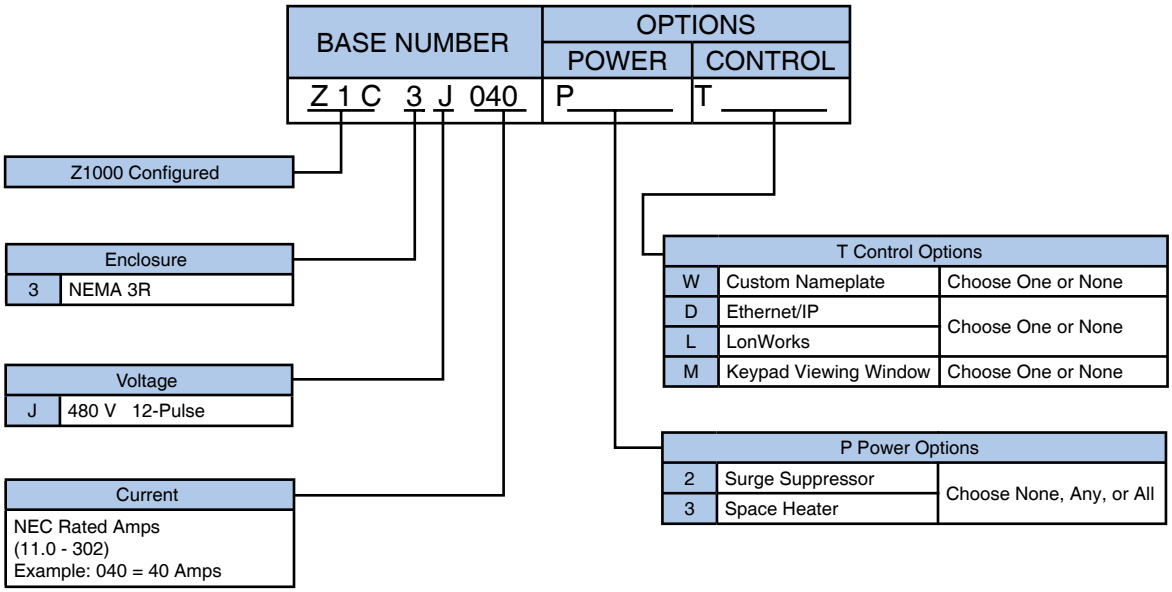
Model Number Configuration (Z1C3J)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1C3J)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Surge Suppressor	(2)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.

12-Pulse Configured Drive NEMA Type 3R (Z1C3J)

Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1C3J)

Rated Input Voltage	Rated Output Current (Amps)	Nominal HP *1	NEMA 3R 12-Pulse Configured	Surge Suppressor	Space Heater

	302	250	J302		

*1. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 480 volts.

Note: Consult factory for outline drawings and schematics.

18-Pulse Bypass Drive NEMA Type 1 (Z1B1K)

Specifications: 480 V NEMA Type 1 (Z1B1K)

The 18-Pulse Z1000 Bypass is engineered for use in HVAC building automation applications that require reliable motor control and reduced harmonic distortion.

The bypass package provides a Z1000 drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto keypad inside a NEMA 1 (UL Type 1) enclosure and a 3-contactor style bypass to allow motor operation from the drive or across the line.

The design also matches an autotransformer with a tuned balance reactor to provide a phase shift that reduces harmonic distortion for cleaner power.

Popular building automation communication protocols BACnet, Siemens APOGEE, Johnson Controls Metasys, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings: Ratings: 5 to 250 HP, 480 Vac
- Overload capacity: 110% for 60 seconds (150% Peak)
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- 140% starting torque capability, available from 3 Hz to 60 Hz
- Remote speed reference (speed command) signal:
  0 to 10 VDC (20 K Ohm)
  4 to 20 mA DC (250 Ohm)
- 7 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 4 programmable multi-function output relays (Form C rated 2 amps @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status Contactor
  - Control for External Bypass
  - Overtorque/undertorque detection

Bypass Features

- Input, Output and Bypass Contactors
- Lockable Main Input Circuit Breaker with 100 kAIC panel rating
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback with two adjustable wait time functions
- Selectable energy savings mode
- No load detection (loss of load) fully monitored in drive and bypass modes

Service Conditions

- Input voltage:
  480 Vac, -15/+10%
- Input frequency:
  50/60 Hz ±5%
- Ambient service temperature: NEMA 1 (IP20):
  -10 °C to 40 °C (14 °F to 104 °F)
- Ambient storage temperature: -20 °C to 70 °C (-4 °F to 158 °F)
- Humidity: 0% to 95% non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Design Features

- Integral 18-Pulse Design
- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- 7 preset speeds
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)

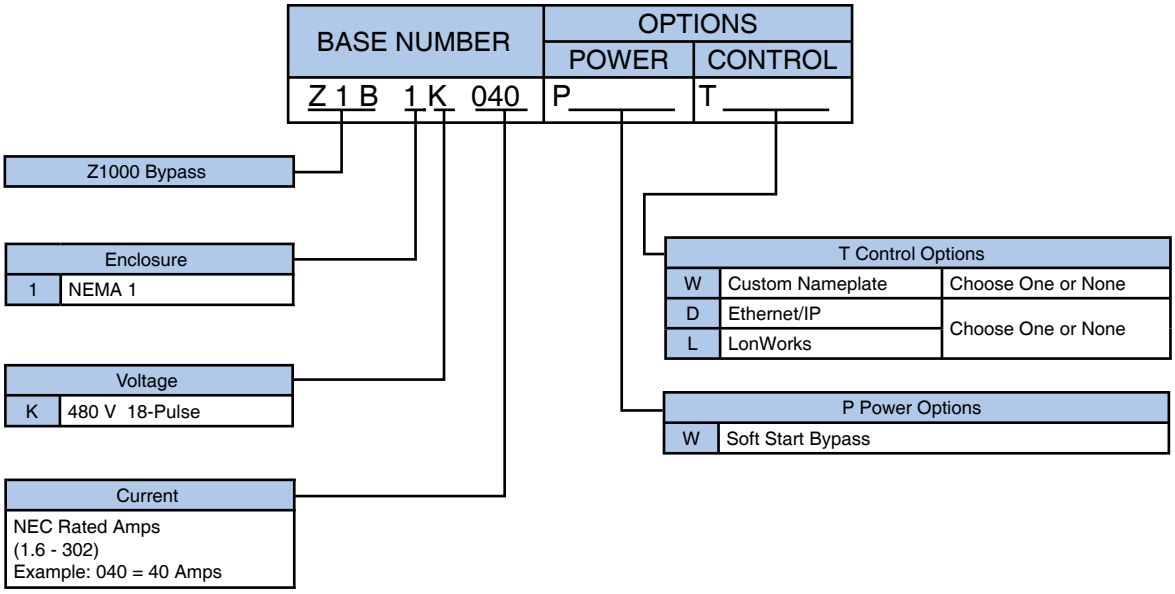
18-Pulse Bypass Drive NEMA Type 1 (Z1B1K)

Model Number Configuration (Z1B1K)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1B1K)

Enclosure Options

NEMA Type 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Soft Start Bypass	(W)	Provides a solid-state adjustable soft starter for use when switching to bypass mode. Option (W) provides a solid-state soft-starter with adjustable ramp to reduce mechanical system stress typically associated with across-the-line bypass motor starts. Select option (W) if the application cannot tolerate the mechanical load stress caused by across-the-line bypass motor starts.

Control Options

Ethernet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.

Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1B1K)

Rated Input Voltage	Rated Output Current (Amps)	Nominal HP *1	NEMA 1 18-Pulse Bypass	Soft Start Bypass

- Internal EMI/RFI filter complies with IEC 61800-3 restricted distribution for first environment (Category 2)
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Drive internal PI closed loop control with selectable engineering units
- Independent PI control for use with external device
- Differential PI feedback feature
- Direct or reverse acting speed signal
- Sleep function in both closed loop and open loop control
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- 24 Vdc, 150 ma transmitter power supply
- Input and output terminal status indication
- Diagnostic fault indication
- Cooling fan operating hours recorded
- VFD efficiency: 98% at full-speed; 96% at half-speed
- “S-curve” soft start / soft stop capability
- Built-in BACnet protocol (BTL certified)
- Modbus/Memobus accessible via RS-422/485 communication, which is standard
- “Kinetic Energy Braking” (KEB) function stops the motor in up to half the time it would take without this function
- LCD keypad: Hand-Off-Auto functions with a built-in copy feature
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action

Standards

- UL 508A (Industrial Control Panels)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)

- IEC 529
- IEEE C62.41
- UL, cUL listed
- BTL certified

Options

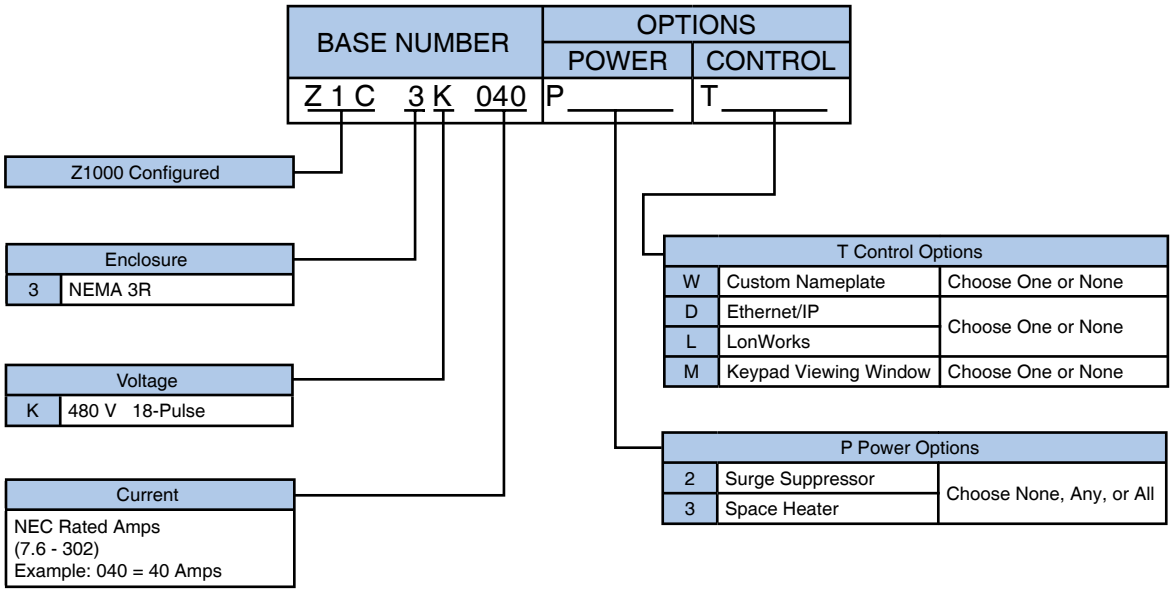
- Surge Suppressor
- Space Heater
- Custom Nameplate
- Keypad Viewing Window
- EtherNet/IP
- LonWorks

18-Pulse Configured Drive NEMA Type 3R (Z1C3K)

Model Number Configuration (Z1C3K)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1C3K)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Surge Suppressor	(2)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.

Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: "AHU #1"). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1C3K)

Rated Input Voltage	Rated Output Current (Amps)	Nominal HP *1	NEMA 3R 18-Pulse Configured	Surge Suppressor	Space Heater
			Z1C3□□□□	2	3
480 V 3-Phase	7.6	5	K007	Available	Available
	11	7.5	K011		
	14	10	K014		
	21	15	K021		
	27	20	K027		
	34	25	K034		
	40	30	K040		
	52	40	K052		
	65	50	K065		
	77	60	K077

	180	150	K180		
	240	200	K240		
	302	250	K302		

*1. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 480 volts.

Note: Consult factory for outline drawings and schematics.

Z1000U Specifications: 200 to 240 V and 380 to 480 V

The Z1000U HVAC MATRIX drive combines superior harmonic mitigation, input power factor control, and energy saving capabilities in a design specifically suited for use in building automation applications requiring reliable motor control.

The Z1000U HVAC MATRIX drive incorporates MATRIX technology to directly convert input AC voltage to output AC voltage. The Z1000U HVAC MATRIX drive offers real choices and benefits for green HVAC applications, and features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy.

Popular building automation communication protocols, BACnet (BTL certified) , Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:

  200 to 240 V, 10 to 100 HP
  380 to 480 V, 7.5 to 350 HP
- V/f Control, Open Loop Vector Control for PM
- Overload capacity: 120% for 60 seconds
- 0-400 Hz Output Frequency
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Torque limiting: 0 to 300%
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- Stationary motor auto-tuning
- 150% starting torque, available from 3 to 60 Hz
- Remote speed reference (speed command) signal:
  - 0 to 10 Vdc/–10 to 10 Vdc (20 K Ohms)
  - 4 to 20 mA/0 to 20 mAdc (250 Ohms)
- Adjustable carrier frequency, from 4 kHz to 10 kHz
- Programmable security code
- 8 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 2x Form A and 1x Form C programmable multi-function output relays (Rated 1 amp @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection

Service Conditions

- Input voltage: 200 to 240 Vac, 380 to 480 Vac, -15/+10%
- Input frequency: 50/60 Hz ±3% (Frequency fluctuation rate: 1 Hz/100 ms or less)
- Ambient service temperature: Open Type (IP00): -10 °C to 50 °C (14 °F to 122 °F)
- Enclosure rating: Protected IP00/Open-Chassis
- Ambient storage temperature: -20 °C to 60 °C (-4 °F to 140 °F)
- Humidity: 0% to 95%, non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0
- 10 to 20 Hz: 9.8 m/s² 20 to 55 Hz: 5.9 m/s² (2□0028 to 2□0081 and 4□0011 to 4□0077), 2.0 m/s² (2□0104 to 2□0248 and 4□0096 to 4□0414)
- Plenum mounting capable (IP20)

Design Features

- Displacement power factor of 0.98 throughout the motor speed range
- Standard LCD Multi-lingual keypad, Full-text , Hand-Off-Auto with Copy (Read/Write) Function
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PID) Controls
- Drive internal PID closed loop control with selectable engineering units
- Independent PID control for use with external device
- Differential PID feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- Input and output terminal status indication
- Diagnostic fault indication
- VFD efficiency: 96% at half-speed; 98% at full-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- No load detection (broken belt alert)
- One fixed “Fault” form C output relay (Rated 1 amp @ 250 Vac & 30 Vdc)
- 6 preset speeds
- Built-in BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus communication
- Eco-Mode to achieve near across-the-line THD and quietest operation
- Energy Savings Monitor
- Motor preheat function
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action
- Built-in EMC Filter
- Built-in line fuses, 100 kAIC
- Energy Savings – Low Power Loss Design
- Compact Package
- Unity Power Factor Control
- IEEE-519 Compliant (<5% TDD) Harmonic Characteristics
- Low Harmonics over Wide Speed Range
- DriveWizard® HVAC Software
- Removable Terminal Block with Memory
- High Reliability with an MTBF of 28 Years
- Short Circuit Withstand Rating: 100K RMS
- Optimal Speed Command Search

Standards

- UL 508C (Power Conversion)
- CSA 22.2 No. 14-95 (Industrial Control Equipment)
- UL 1995 (Plenum)
- CE mark 2006/95/EC LVD
- CE mark 2004/108/EC
- ROHS Compliant
- IEC 61800-5-1 (LVD)
- EN 61800-3:2004
- IEC 529
- IEEE C62.41
- UL, cUL listed; CE marked
- BACnet (BTL) Certified

Options

- LonWorks Interface
- EtherNet/IP
- Modbus TCP/IP

Z1000U Model Selection 200 to 240 V

Rated Input Voltage	Rating		Standard Enclosure
	Rated Output Amps *1 *2	HP *3 240 V (208 V)	Model Number CIMR-ZU2E□□□□AUA With built-in EMC noise filter.
200 to 240 V 3-Phase	28	10 (7.5)	0028
	42	15 (10)	0042
	54	20 (15)	0054
	68	25 (20)	0068
	81	30 (25)	0081
	104	40 (30)	0104
	130	50 (40)	0130
	154	60 (50)	0154
	192	75 (60)	0192
	248	100 (75)	0248

*1. The rated output current of the drive should be equal to or greater than the motor rated current.

*2. Carrier frequency is set to 4 kHz. Current derating is required to raise the carrier frequency.

*3. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at (208) or 240 volts.

Z1000U Model Selection 380 to 480 V

Rated Input Voltage	Rating		Standard Enclosure
	Rated Output Amps *1 *2	Nominal HP *3	Model Number CIMR-ZU4E□□□□AUA With built-in EMC noise filter.
380 to 480 V 3-Phase	11	7.5	0011
	14	10	0014

	240	200	0240
	302	250	0302
	361	300	0361
	414	350	0414

*1. The rated output current of the drive should be equal to or greater than the motor rated current.

*2. Carrier frequency is set to 4 kHz. Current derating is required to raise the carrier frequency.

*3. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 480 volts.

Z1000U Options

End Cap Kits NEMA 1

This option consists of a top and bottom cover to convert a protected IP00/Open Type drive to a IP20/NEMA 1, UL Type 1 enclosed unit. This option DOES NOT provide additional space for mounting auxiliary components (i.e., circuit breaker, input fuses, reactor, etc.).

Rated Input Voltage	Drive Model Number CIMR-ZU2E□□□□AUA	Part Number
200 to 240 V 3-Phase	0028	EZZ022745A

24 Vdc Control Power

Model No.	Option Name	Description
PS-U10L	24 V Control Power (200 V Drives)	The 24 V Power Supply option supplies the drive control circuit with power when there is no main circuit power. The option provides external power to the control circuit only. It will not provide power to the drive main circuit. The option lets users access network communications, digital operator navigation, I/O data, and read fault and parameter data
PS-U10H	24 V Control Power (400 V Drives)	

External Heatsink Kits NEMA 1

External Heatsink Kit: Allows drives to be mounted with the drive's heatsink external (NEMA 1 backside) to the enclosure. Option kit for customer mounting. Larger standard drives include brackets.

Rated Input Voltage	Drive Model Number CIMR-ZU2E□□□□AUA	Part Number

Z1000U Control and Communication Options

These cards, cables, and devices add control functionality to the standard drive. Items are shipped loose, unmounted.

Digital Operator and Software

Model No.	Option Name	Description
UOP000016 (JVOP-183)	Digital Operator (LCD)	This option is the standard digital operator found on the drive. This option is only required if the original digital operator is lost or damaged. If used as a remote operator, the standard digital operator may be used, but then requires Installation Set A (EZZ020642A) for panel or door mounting and Remote Operator Cable (UWR0051 or UWR0052), each sold separately. Features include: • LCD keypad display, 5 lines x 16 characters, backlit • 7 languages • Copy function • Mounts to RJ-45 keypad port
EZZ020642A	LCD/LED Keypad Installation Set A (Remote Operator Mounting Bracket Kit)	This is a bracket to which the LCD Digital Remote Operator (JVOP-183) attaches, and has (4) threaded holes and screws to attach to the cover of an enclosure. The kit contains (2) screws to mount the Operator to the bracket and (4) screws to attach the bracket to the enclosure.
EZZ020642B	LCD/LED Keypad Installation Set B (Remote Operator Mounting Bracket Kit)	Contains a similar bracket that the keypad attaches to and has non-threaded holes for mounting to an enclosure that has the screws attached to the enclosure already. The kit contains (2) screws to mount the keypad to the bracket and (4) nuts to attach the bracket to the customer supplied screws attached to the enclosure.
UUX000922	Keypad Adapter Kit	This kit can be used when a “new” Z1000 keypad is replacing an “old style” key pad used with E7-based Z1000 drives. This kit will allow enclosure door mounted key pad to be upgraded from E7 style to the Z1000 style digital key pad.
UWR0051	Operator Cable, Remote (1 meter)	These cables are used to connect the Remote Digital Operator (JVOP-18□). They are available in one (1) or three (3) meter lengths.
UWR0052	Operator Cable, Remote (3 meter)	
UUX000526 (Blank Membrane)	Operator Kits, NEMA Type 3R/4X	This option is used to extend an LCD or LED Digital Remote Operator to the wall of a separately specified, oversized UL Type 3R, 4, 4X, or 12 enclosure (IPX6 environment). Item includes a faceplate bezel with digital operator brackets and membrane to cover the operator cutout in the enclosure door, a 3-foot cable, a 10-foot cable, and a 1:1 template for cutting the necessary cutouts in the enclosure. Keypad can be removed after kit installation. Designed for use with **1000 series Digital Remote Operators (sold separately)**. Connects to RJ-45 port and mounts to enclosure wall.
UUX000527 (Yaskawa Logo Membrane)		
UNP00233-3 (Yaskawa Logo)	Overlay, Keypad, Self-adhesive	This membrane is used to cover the operator cutout in the enclosure door to which the keypad has been remotely mounted.
UNP00233-5 (Blank)		
UOP000017 (Yaskawa Logo Faceplate Membrane)	UL Rated Remote Outdoor Operator/ Mounting Kit	UL Rated Remote Outdoor Operator / Mounting Kit. This option provides all you will need to remotely mount the drive's Digital Operator to the door/wall of a separately specified, oversized UL Type 1, 3R, 4, 4X, or 12 enclosure (IPX6 environment). This kit includes: One JVOP-183R Digital Operator providing RTC, HOA, and outdoor rated LCD display, a faceplate bezel with digital operator brackets and membrane to cover the operator cutout in the enclosure door, a 3-foot cable, a 10-foot cable, and a 1:1 template for cutting the necessary cutouts in the enclosure. Mounting hardware is included. Keypad can be removed after kit installation. Connects to RJ-45 port and mounts to enclosure wall.
UOP000019 (Blank Faceplate Membrane)		
SW.DW.40	DriveWizard® HVAC Software	This optional software package allows upload and download of parameters via PC for data storage and for programming multiple drives. The software also includes graphing and monitoring tools. It is a Windows-based program designed to make startup, commissioning, and troubleshooting the drive as simple as possible. Refer to our website at **www.yaskawa.com** to download the software, and for more information, including minimum system requirements and cable information to interface a PC to the drive.
UWR-00638	USB Interface Cable	This 10-foot male USB-A to male USB-B cable provides a USB-to-USB connection from PC to the drive.
UWR-01076-1	Flash Write Cable	This 6-foot cable connects a PC’s 9-pin serial port to the drive’s keypad port for updating the drive’s firmware, flashing with custom firmware, or updating a network communication option board. It is used with the Flash Tool feature of the DriveWizard® HVAC software.
UWR00468-2	PC Interface Cable	This 6-foot cable interconnects the drive keypad port to the 9-pin communication port on a PC. This cable is used in conjunction with DriveWizard® HVAC software.

Support Tools

Model No.	Option Name	Description
JVOP-181	USB Copy Unit (Y-Stick)	This option allows the drive to connect to the USB port on a PC. It can read, copy and verify drive parameter settings from one drive to another like drive. The unit plugs into the RJ-45 port on the front of the digital operator. Refer to our website at www.yaskawa.com to download the software.
No Model Number	CopyUnitManager Software for USB Copy Unit (Y-Stick)	This option allows the user to transfer and save parameter files from the Copy Unit (JVOP-181), sold separately, to a PC and vice versa. Refer to our website at www.yaskawa.com to download the software.

Network Communications

Model No.	Option Name	Description
SI-W3	LonWorks	This option is compatible with the LonMark Interoperability Association and complies with the Functional Profile for a Variable Frequency Motor Drive. Network connectivity is facilitated by either a Phoenix-style screw termination or RJ-45 connector. Mounts at option connector CN5-A.
SI-EN3	EtherNet/IP	This option complies with the EtherNet/IP protocol specification, and allows for communication over 10/100 Mbps Ethernet networks. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. The IP address can be set from the drive keypad or from the network. All parameters, diagnostics, and operational commands are accessible via EtherNet/IP. The web interface allows management of diagnostic information through a standard web browser. The embedded web pages include the main page, drive status page, network monitor page, and documentation page. Mounts at option connector CN5-A.
SI-EM3	Modbus TCP/IP	This option complies with the Modbus TCP/IP protocol specification. This allows for Modbus communication over 10/100 Mbps Ethernet networks. This option has the ability to configure the IP Address from a user-specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics, and operational commands are accessible via Modbus TCP/IP. This option supports up to 10 simultaneous PLC/PC connections. Mounts at option connector CN5-A.
SI-EN3D	EtherNet/IP with device level ring (DLR)	This option complies with the EtherNet/IP protocol specification. This allows for communication over 10/100 Mbps Ethernet networks. The dual port hardware provides the user the choice of wiring in a star, line or ring configuration. For a ring configuration, device level ring (DLR) is available on this option card. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics and operational commands are accessible via EtherNet/IP. Auto-tuning the motor is also possible through this option using the DriveWizard PC program. Mounts at option connector CN5-A.
SI-EM3D	Modbus TCP/IP – Dual Port	This option complies with the Modbus TCP/IP protocol specification. This allows for Modbus communication over 10/100 Mbps Ethernet networks. The dual port hardware provides the user the choice of wiring in a star, line or ring configuration. For a ring configuration, rapid spanning tree protocol (RSTP) is available on this option card. This option has the ability to configure the IP Address from a user specified IP address, from a DHCP host, or from a BootP host. All parameters, diagnostics and operational commands are accessible via Modbus TCP/IP. Auto-tuning the motor is also possible through this option using the DriveWizard PC program. This option supports up to 10 simultaneous PLC/PC connections. Mounts at option connector CN5-A.

Specifications: 208 and 480 V NEMA Type 1 (Z1D1)

The Z1000U MATRIX Bypass combines excellent harmonic mitigation, input power factor control, and energy saving capabilities in a design specifically suited for use in HVAC building automation applications that require reliable motor control.

The bypass package provides a Z1000U MATRIX drive in a NEMA 1 (UL Type 1) enclosure with input circuit breaker, and 2-contactor style bypass to allow motor operation from the drive or across the line. The Z1000U HVAC MATRIX drive incorporates MATRIX technology to directly convert input AC voltage to output AC voltage. The Z1000U HVAC MATRIX drive offers real choices and benefits for green HVAC applications.

The Z1000U features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy. Popular building automation communication protocols BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  208 V, 7.5 to 75 HP
  480 V, 7.5 to 350 HP
- V/f Control, Open Loop Vector Control for PM
- Overload capacity: 120% for 60 seconds
- 0-400 Hz Output Frequency
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Torque limiting: 0 to 300%
- Power loss ride through: 2 seconds
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- Stationary motor auto-tuning
- 150% starting torque capability, available from 3 to 60 Hz
- Remote speed reference (speed command) signal:
  - 0 to 10 Vdc/–10 to 10 Vdc (20 K Ohms)
  - 4 to 20 mA/0 to 20 mAdc (250 Ohms)

Bypass Features

- Output and bypass contactors
- Lockable main input circuit breaker
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback and two adjustable wait time functions
- Selectable energy savings mode
- No load detection (loss of load) fully monitored in drive and bypass modes.

Design Features

- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Standard LCD Multi-lingual keypad, Full-text , Hand-Off-Auto with Copy (Read/Write) Function
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PID) Controls
- Drive internal PID closed loop control with selectable engineering units
- Independent PID control for use with external device
- Differential PID feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- Input and output terminal status indication
- Diagnostic fault indication
- VFD efficiency: 96% at half-speed; 98% at full-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- Adjustable carrier frequency, 4 kHz to 10 kHz
- Programmable security code
- 8 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 2x Form A and 1x Form C programmable multi-function output relays (Rated 1 amp @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection
- One fixed “Fault” form C output relay (Rated 1 amp @ 250 Vac & 30 Vdc)
- 6 preset speeds
- Built-in BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus communication
- Energy Savings Monitor
- Eco-Mode to achieve near across-the-line THD and quietest operation
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto
- Emergency override can be used as “smoke purge”
- Fan failure detection and selectable drive action
- Built-in EMC Filter
- Built-in input fuses
- Input circuit breaker (100 kAIC)
- Energy Savings – Low Power Loss Design
- Compact Package
- Unity Power Factor Control
- IEEE-519 Compliant (<5% TDD) Harmonic Characteristics
- Low Harmonics over Wide Speed Range
- DriveWizard® HVAC Software
- Removable Terminal Block with Memory
- High Reliability with an MTBF of 28 Years
- Short Circuit Withstand Rating: 100K RMS
- Optimal Speed Command Search

Service Conditions

- Input voltage: 208 Vac, 480 Vac, -15/+10%
- Input frequency: 50/60 Hz ±3% (Frequency fluctuation rate: 1 Hz/100 ms or less)
- Ambient service temperature: NEMA 1 (IP20): -10 °C to 40 °C (14 °F to 104 °F)
- Maximum ambient storage temperature: -20 to 60 °C (-4 to 140 °F)
- Humidity: 0% to 95%, non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating

Standards

- UL 508A (Industrial Control Panels)

Options

- 3-Contactor Bypass
- Drive Service Switch
- 5% Output Reactor
- Soft-start Bypass
- Custom Nameplate
- Speed Pot (door mounted)
- 200 VA Control Power Transformer
- LonWorks Interface
- EtherNet/IP

Model Number Configuration (Z1D1)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.

BASE NUMBER	OPTIONS	
	POWER	CONTROL
Z 1 D 1 B 040	PN	T

Z1000U Bypass

Enclosure	
1	NEMA 1

Voltage	
D	208 V
B	480 V

Current
NEC Rated Amps (1.6 - 302) Example: 040 = 40 Amps

T Control Options		
W	Custom Nameplate	Choose One or None
D	Ethernet/IP	Choose One or None
L	LonWorks	
Z	Speed Pot	Choose One or None
K	200 VA Transformer (CPT)	Choose One or None

P Power Options		
N	EMC Filter	Included*
G	Drive Service Switch	Choose One or None
B	3-Contactor Bypass	
K	Output Reactor 5%	Choose One or None
W	Soft Start Bypass	Choose One or None

* An EMC filter is internal to the Z1000U drive.

Options (Z1D1)

Enclosure Options

NEMA 1	(1)	The drive and Configured options are provided in a NEMA Type 1 ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Drive Input Circuit	(B, G)	For a 3-contactor bypass that removes power from the drive, select option (B). Drive service switch that removes power from the drive, select option (G).
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Soft Start Bypass	(W)*1	Provides a solid-state adjustable soft starter for use when switching to bypass mode. Option (W) provides a solid-state soft-starter with adjustable ramp to reduce mechanical system stress typically associated with across-the-line bypass motor starts. Select option (W) if the application cannot tolerate the mechanical load stress caused by across-the-line bypass motor starts. **Note *1:** The following Z1D1 models have a short circuit withstand rating of 65 kA RMS symmetrical when option W is specified: - Z1D1B011 to Z1D1B156 - Z1D1D024 to Z1D1D143 Other Z1D1 models have a short circuit withstand rating of 100 kA RMS symmetrical when option W is specified.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Model and Power Option Selection (Z1D1)

208 V Models and Power Options

Z1000U MATRIX Bypass Drive NEMA Type 3R (Z1D3)

Specifications: 208 and 480 V NEMA Type 3R (Z1D3)

The Z1000U MATRIX Bypass combines excellent harmonic mitigation, input power factor control, and energy saving capabilities in a design specifically suited for use in HVAC building automation applications that require reliable motor control.

The bypass package provides a Z1000U MATRIX drive in a NEMA 3R (UL Type 3R) enclosure with input circuit breaker, and 2-contactor style bypass to allow motor operation from the drive or across the line. The Z1000U HVAC MATRIX drive incorporates MATRIX technology to directly convert input AC voltage to output AC voltage. The Z1000U HVAC MATRIX drive offers real choices and benefits for green HVAC applications.

The Z1000U features HVAC application-specific software macros, a Hand-Off-Auto LCD keypad, and a real time clock for system accuracy. Popular building automation communication protocols BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  208 V, 7.5 to 75 HP
  480 V, 7.5 to 350 HP
- V/f Control, Open Loop Vector Control for PM
- Overload capacity: 120% for 60 seconds
- 0-400 Hz Output Frequency
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Torque limiting: 0 to 300%
- Power loss ride through: 2 seconds
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- Stationary motor auto-tuning
- 150% starting torque capability, available from 3 to 60 Hz
- Remote speed reference (speed command) signal:
  - 0 to 10 Vdc/–10 to 10 Vdc (20 K Ohms)
  - 4 to 20 mA/0 to 20 mAdc (250 Ohms)

Bypass Features

- Output and bypass contactors
- Lockable main input circuit breaker
- Thermal motor overload relay, class 20
- 115 Vac control transformer, fused
- Drive H/O/A keypad used for bypass control
- Damper control circuit with end of travel feedback and two adjustable wait time functions
- Selectable energy savings mode
- No load detection (loss of load) fully monitored in drive and bypass modes.

Design Features

- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Standard LCD Multi-lingual keypad, Full-text , Hand-Off-Auto with Copy (Read/Write) Function
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PID) Controls
- Drive internal PID closed loop control with selectable engineering units
- Independent PID control for use with external device
- Differential PID feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- Input and output terminal status indication
- Diagnostic fault indication
- VFD efficiency: 96% at half-speed; 98% at full-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- Serial communication status
- Adjustable carrier frequency, 4 kHz to 10 kHz
- Programmable security code
- 8 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 2x Form A and 1x Form C programmable multi-function output relays (Rated 1 amp @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection
- One fixed “Fault” form C output relay (Rated 1 amp @ 250 Vac & 30 Vdc)
- 6 preset speeds
- Built-in BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus communication
- Energy Savings Monitor
- Eco-Mode to achieve near across-the-line THD and quietest operation
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto
- Emergency override can be used as “smoke purge”
- Fan failure detection and selectable drive action
- Built-in EMC Filter
- Built-in input fuses
- Input circuit breaker (100 kAIC)
- Energy Savings – Low Power Loss Design
- Compact Package
- Unity Power Factor Control
- IEEE-519 Compliant (<5% TDD) Harmonic Characteristics
- Low Harmonics over Wide Speed Range
- DriveWizard® HVAC Software
- Removable Terminal Block with Memory
- High Reliability with an MTBF of 28 Years
- Short Circuit Withstand Rating: 100K RMS
- Optimal Speed Command Search

Service Conditions

- Input voltage: 208 Vac, 480 Vac, -15/+10%
- Input frequency: 50/60 Hz ±3% (Frequency fluctuation rate: 1 Hz/100 ms or less)
- Ambient service temperature: NEMA 3R: -10 °C to 40 °C (14 °F to 104 °F)
- Maximum ambient storage temperature: -20 to 60 °C (-4 to 140 °F)
- Humidity: 0% to 95%, non-condensing
- Altitude: to 1000 meters (3300 feet)

Standards

- UL 508A (Industrial Control Panels)

Options

- 3-Contactor Bypass
- Drive Service Switch
- 5% Output Reactor
- Soft-start Bypass
- Custom Nameplate
- Speed Pot (door mounted)
- 200 VA Control Power Transformer
- LonWorks Interface
- EtherNet/IP
- Keypad Viewing Window
- Surge Suppressor
- Space Heater

Model Number Configuration (Z1D3)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.

Step 3. Find the list price for the Base Number selected from the following pages. Add the list price of each selected option to this base price.

BASE NUMBER	OPTIONS	
	POWER	CONTROL
Z 1 D 3 B 040	PN	T

Z1000U Bypass

Enclosure

3	NEMA 3R

Voltage

D	208 V
B	480 V

Current

NEC Rated Amps
(1.6 - 302)
Example: 040 = 40 Amps

T Control Options

W	Custom Nameplate	Choose One or None
D	Ethernet/IP	Choose One or None
L	LonWorks	
Z	Speed Pot	Choose One or None
K	200 VA Transformer (CPT)	Choose One or None
M	Keypad Viewing Window	Choose One or None

P Power Options

N	EMC Filter	Included*
G	Drive Service Switch	Choose One or None
B	3-Contactor Bypass	
K	Output Reactor 5%	Choose One or None
W	Soft Start Bypass	Choose One or None
7	Surge Suppressor	Choose Both, One, or None
3	Space Heater	

* An EMC filter is internal to the Z1000U drive.

Options (Z1D3)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Z1000U MATRIX Bypass Drive NEMA Type 3R (Z1D3)

Power Options

Drive Input Circuit	(B, G)	For a 3-contactor bypass that removes power from the drive, select option (B). Drive service switch that removes power from the drive, select option (G).
Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Soft Start Bypass	(W) *1	Provides a solid-state adjustable soft starter for use when switching to bypass mode. Option (W) provides a solid-state soft-starter with adjustable ramp to reduce mechanical system stress typically associated with across-the-line bypass motor starts. Select option (W) if the application cannot tolerate the mechanical load stress caused by across-the-line bypass motor starts. **Note *1:** The following Z1D1 models have a short circuit withstand rating of 65 kA RMS symmetrical when option W is specified: - Z1D3B011 to Z1D3B156 - Z1D3D024 to Z1D3D143 Other Z1D1 models have a short circuit withstand rating of 100 kA RMS symmetrical when option W is specified.
Surge Suppressor	(7)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.

Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Options (Field Install Only)

Freestanding Leg Kit NEMA 3R	UUX001158	**12 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.
	UUX001159	**30 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.

Model and Power Option Selection (Z1D3)

*1. Horsepower rating is based on standard NEMA B, 4-pole motor design as represented in NEC table 430.150 Full-Load Current, Three-Phase Alternating Current Motors at 480 volts.

*2. Includes an internal EMC filter.

Dimensions and Data (Z1D3)

Refer to the product page on the Yaskawa website for dimension, weight, and schematic diagram data depending on drive model and installed options.

Use document PD.Z1000.01 for 208 V models

Use document PD.Z1000.02 for 480 V models

Z1000U MATRIX Configured Drive NEMA Type 1 (Z1E1)

Specifications: 208 and 480 V NEMA Type 1 (Z1E1)

The Z1000U Configured variable-speed MATRIX drive combines excellent harmonic mitigation, input power factor control, and energy saving capabilities in a design allowing flexibility when providing the features and options commonly specified by facility designers.

The configured package provides a Z1000U MATRIX drive containing HVAC application-specific software macros, a real time clock, and Hand-Off-Auto LCD keypad with an input disconnect switch and space for several power options inside a NEMA 1 (UL Type 1) enclosure.

The Z1000U HVAC MATRIX drive incorporates MATRIX technology to directly convert input AC voltage to output AC voltage. The Z1000U HVAC MATRIX drive offers real choices and benefits for green HVAC applications.

Popular building automation communication protocols BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus are embedded in the drive. Interface cards for LonWorks and EtherNet/IP communications are offered separately.

Performance Features

- VT Ratings:
  208 V, 7.5 to 75 HP
  480 V, 7.5 to 350 HP
- V/f Control, Open Loop Vector Control for PM
- Overload capacity: 120% for 60 seconds
- 0-400 Hz Output Frequency
- DC Injection braking: at start or stop, adjustable, current limited (anti-windmilling)
- Adjustable accel/decel: 0.1 to 6000 seconds
- Controlled speed range: 40:1
- Critical frequency rejection capability: 3 selectable, adjustable bands
- Torque limiting: 0 to 300%
- Power loss ride through: 2 seconds
- Auto restart after power loss or resettable fault, selectable, programmable
- Up/down floating point control capability
- Stationary motor auto-tuning

Design Features

- Displacement power factor of 0.98 throughout the motor speed range
- NEC rated input / output amps
- Standard LCD Multi-lingual keypad, Full-text , Hand-Off-Auto with Copy (Read/Write) Function
- Built-In real time clock for time and date stamping events along with timer functions for starting, stopping and speed changes without the need for external controls
- Volt meter, ammeter, kilowatt meter elapsed run time meter and heat sink temperature monitoring functions
- Two internal (PID) Controls
- Drive internal PID closed loop control with selectable engineering units
- Independent PID control for use with external device
- Differential PID feedback feature
- Sleep function in both closed loop and open loop control
- Feedback signal low pass filter
- Feedback signal loss detection and selectable response strategy
- Feedback signal inverse and square root capability
- Input and output terminal status indication
- Diagnostic fault indication
- VFD efficiency: 96% at half-speed; 98% at full-speed
- “S-curve” soft start / soft stop capability
- Serial communication loss detection and selectable response strategy
- 150% starting torque capability, available from 3 Hz
- Remote speed reference (speed command) signal:
  - 0 to 10 Vdc/–10 to 10 Vdc (20 K Ohms)
  - 4 to 20 mA/0 to 20 mAdc (250 Ohms)
- Adjustable carrier frequency, from 4 kHz to 10 kHz
- Programmable security code
- 8 programmable multi-function input terminals (24 Vdc) providing 60+ programmable features, including:
  - Customer Safeties
  - BAS / Damper Interlock
  - Emergency Override
  - Preset Speed
  - PI control enable / disable
- 2x Form A and 1x Form C programmable multi-function output relays (Rated 1 amp @ 250 Vac & 30 Vdc), providing 50+ functions, including:
  - Damper control
  - Hand/Auto Status
  - Contactor Control for External Bypass
  - Overtorque/undertorque detection
- Serial communication status
- No load detection (broken belt alert)
- One fixed “Fault” form C output relay (Rated 1 amp @ 250 Vac & 30 Vdc)
- 6 preset speeds
- Built-in BACnet (BTL certified), Siemens APOGEE FLN, Johnson Controls Metasys N2, and MEMOBUS/Modbus communication
- Energy Savings Monitor
- Eco-Mode to achieve near across-the-line THD and quietest operation
- Flash upgradeable firmware
- Customizable monitor display
- Heat sink over temperature speed foldback feature
- “Bumpless” transfer between Hand and Auto modes
- Emergency override can be used as “smoke purge” function
- Fan failure detection and selectable drive action
- Built-in EMC Filter
- Built-in input fuses
- Input disconnect switch
- Energy Savings – Low Power Loss Design
- Compact Package
- Unity Power Factor Control
- IEEE-519 Compliant (<5% TDD) Harmonic Characteristics
- Low Harmonics over Wide Speed Range
- DriveWizard® HVAC Software
- Removable Terminal Block with Memory
- High Reliability with an MTBF of 28 Years
- Short Circuit Withstand Rating: 100K RMS (with optional circuit breaker)
- Optimal Speed Command Search

Service Conditions

- Input voltage: 208 Vac, 480 Vac, -15/+10%
- Input frequency: 50/60 Hz ±3% (Frequency fluctuation rate: 1 Hz/100 ms or less)
- Maximum ambient service temperature NEMA 1: -10 to 40 °C (14 to 104 °F)
- Maximum ambient storage temperature: -20 to 60 °C (-4 to 140 °F)
- Humidity: 0% to 95%, non-condensing
- Altitude: to 1000 meters (3300 feet); higher by derating
- Service factor: 1.0

Standards

- UL 508A (Industrial Control Panels)

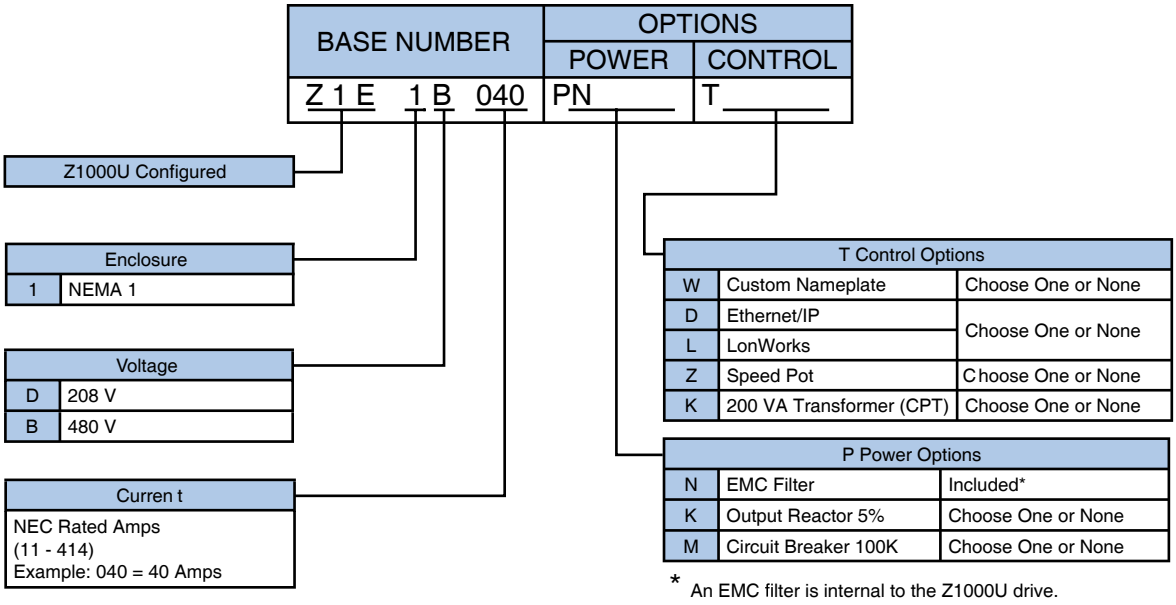
Options

- 5% Output Reactor
- Lockable input Circuit Breaker (100 kAIC)
- Custom Nameplate
- Speed Pot (door mounted)
- 200 VA Control Power Transformer
- LonWorks Interface
- EtherNet/IP

Model Number Configuration (Z1E1)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.



Options (Z1E1)

Power Options

Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Circuit Breaker 100 kAIC	(M)	Lockable input Circuit Breaker (100 kAIC panel rating).

Z1000U MATRIX Configured Drive NEMA Type 1 (Z1E1)

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Z1000U MATRIX Configured Drive NEMA Type 3R (Z1E3)

Model Number Configuration (Z1E3)

Step 1. Complete the Base Number for the voltage and current rating.

Step 2. Add the Option Code letter for each required option. If an option is not wanted, no character is inserted in that position.

Step 3. Find the list price for the Base Number selected from the following pages. Add the list price of each selected option to this base price.

BASE NUMBER	OPTIONS	
	POWER	CONTROL
Z 1 E 3 B 040	PN	T

Z1000U Configured

Enclosure	
3	NEMA 3R

Voltage	
D	208 V
B	480 V

Current
NEC Rated Amps (11 - 414) Example: 040 = 40 Amps

T Control Options		
W	Custom Nameplate	Choose One or None
D	Ethernet/IP	Choose One or None
L	LonWorks	
Z	Speed Pot	Choose One or None
K	200 VA Transformer (CPT)	Choose One or None
M	Keypad Viewing Window	Choose One or None

P Power Options		
N	EMC Filter	Included*
K	Output Reactor 5%	Choose One or None
M	Circuit Breaker 100K	Choose One or None
7	Surge Suppressor	Choose Both, One, or None
3	Space Heater	

* An EMC filter is internal to the Z1000U drive.

Options (Z1E3)

Enclosure Options

NEMA 3R	(3)	The drive and configured options are provided in a NEMA Type 3R ventilated enclosure, large enough to accommodate any or all of the Configured package options.

Power Options

Output Reactor	(K)	No form of output impedance is normally required. A 5% load reactor, option (K), is available if additional output impedance is desired (usually for long lead-lengths or noise reduction).
Circuit Breaker 100 kAIC	(M)	Lockable input Circuit Breaker (100 kAIC panel rating).

Surge Suppressor	(7)	This option provides a degree of protection from transient surges coming through the power line cables. Lightning strikes are the most common source of surges.
Space Heater	(3)	This option helps reduce condensation.

Control Options

EtherNet/IP SI-EN3	(D)	EtherNet/IP, option (D), requires the addition of an optional board.
LonWorks SI-W3	(L)	LonWorks, option (L), requires the addition of an optional board.
Keypad Viewing Window	(M)	The digital drive keypad is mounted on the outside of the NEMA 3R enclosure door. This option provides a viewing window that is hinged and lockable.
200 VA Transformer (CPT)	(K)	200 VA Control Power Transformer (for customer use).
Speed pot	(Z)	Door mounted.
Custom Nameplates	(W)	Custom engraved nameplates with white lettering on black lamicoid are available with option (W), for special tagging purposes (Example: “AHU #1”). Note that this option requires the text to be specified by the customer.

Options (Field Install Only)

Freestanding Leg Kit NEMA 3R	UUX001158	**12 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.
	UUX001159	**30 in. Leg Kit:** This option allows the NEMA 3R wall-mount enclosures to be mounted on legs so that the control can be freestanding and off the ground. Either kit can be used on any of the wall-mount enclosures. Floor-mount enclosures come standard with freestanding legs.

*2. Includes an internal EMC filter.

Dimensions and Data (Z1E3)

Refer to the product page on the Yaskawa website for dimension, weight, and schematic diagram data depending on drive model and installed options.

Use document PD.Z1000.05 for 208 V models

Use document PD.Z1000.06 for 480 V models

Technical Training

In today's world of global competition, it is impossible for a company to survive without "state-of-the-art" technically trained associates and customers. Yaskawa Technical Training Services (TTS) is comprised of engineers who are specialists in their field.

Yaskawa America has three training facilities in the United States. The primary training facility is in Yaskawa America's North American Headquarters in Waukegan, Illinois (45 miles north of Chicago, 50 miles south of Milwaukee). This facility has six training rooms; two lecture halls, two training rooms and two training labs.

Besides the possibility of attending training classes in Waukegan and Los Angeles, Yaskawa America can also bring training to the customer. On-site classes are available in two varieties. The first is to duplicate the official training classes at the customer's location. Full functioning demo units, data projector, computer and documentation can be shipped to recreate the official class on-site. The second variety is road show training. Road show training is a one-day training class that is specifically tailored to the students' needs and questions. Only basic demos are used and the topics covered in class are generated by the students in attendance.

The Yaskawa Virtual Training Room is another training option. All you need is an Internet connection and a telephone. This is a live, interactive training class, which gives you the ability to talk to the instructor as well as other students. The Internet connection allows us to show slides and demonstrate software packages. The telephone is for the audio portion of the training class. Web classes can be found on the Yaskawa formal training schedule and can also be done on-demand, per the time and preference of the customer.

To enroll, contact Technical Training Services.
